history of reading and writing as cultural techniques At a time of debate about the future of English as a discipline and the fundamental methods of literary study few terms appear more frequently than close reading now widely regarded as the core practice of literary study But what exactly is close reading and where did it come from Here John Guillory author of the acclaimed *Professing Criticism* takes up two puzzles First why did the New Critics who supposedly made close reading central to literary study so seldom use the term And second why have scholars not been better able to define close reading For Guillory these puzzles are intertwined The literary critics of the interwar period he argues weren't aiming to devise a method of reading at all These critics were most urgently concerned with establishing the judgment of literature on more rigorous grounds than previously obtained in criticism Guillory understands close reading as a technique a particular kind of methodical procedure that can be described but not prescribed and that is transmitted largely by demonstration and imitation Guillory's short book will be essential reading for all college teachers of literature An annotated bibliography curated by Scott Newstok provides a guide to key documents in the history of close reading along with valuable suggestions for further research *The Penguin Dictionary of Literary Terms and Literary Theory* John Anthony Cuddon,2007

Literary Meaning Wendell V. Harris, 1996-01-01 Literary theory according to Wendell Harris has over the last twenty five years become increasingly characterized by illogical arguments an esoteric vocabulary and gnomic references to what various authority figures are presumed to have demonstrated Arcane modes of argument and unargued assumptions leave the reader of contemporary theorists frustrated little of the resulting criticism entices the reader to seek out the literary work itself Harris argues that regardless of the specifics of individual theories the central struggle is between traditional hermeneutics in which the interpretation of the author s intended meaning is the necessary first step in any response to a text and the more recent hermeticism which seeks to deny the relevance of intention the possibility of determinate meaning and the reference of language to any reality beyond itself With wit insight and analytical precision Harris critiques the misunderstanding of scientific method spawned by the failure of structuralism the absolutism of poststructuralism and the confusions over contextualism and historicism He concludes with an analysis of the hollowness of the current model of professionalism in literature departments
