**A Dictionary of Architecture and Building, Vol. 2 of 3** Russell Sturgis, 2018-02-28 Excerpt from *A Dictionary of Architecture and Building Vol 2 of 3* Biographical, Historical, and Descriptive. A good dictionary will be good reading even if a column or a page be read consecutively, but it will be still better reading if the reader is in the mood to take a little pains and turns to one article after another, following not the alphabetical sequence of the terms but the sequence of his own thought. This matter of the student's use of the book briefly touched upon in the Preface to Vol I becomes of more obvious importance.

now that two thirds of the whole work is in print There are some large general subjects which can be fairly well studied if this plan is followed and with the appearance of the third and final volume four months hence these studies can be carried yet farther An Obvious instance is that subject the most important to us moderns of all matters of architectural history the system of building and design of the great Empire from 50 b c To 250 a d The building and the art of the European world since that time and of much beyond the European world take their origin in what was done during that epoch and yet there is so little generally known about it and it is so misunderstood that all architectural thought and writing is seriously marred by this lack of accuracy This very subject will be found treated at great length in the Dictionary If for instance the reader begins with Italy Part IX Latium and especially the second division of Part IX Where the city of Rome itself is treated if then he seeks in the other parts of the article Italy for Roman remains and farther in the article France especially Part X and in Asia Minor the Balkan Peninsula and North Africa if he then studies Memorial Arch Memorial Column Amphitheatre Basilica and the technical terms referred to under Columnar Architecture the subject will have been presented to him from several points of view The appearance in Vol III Of the general article on Roman Imperial Architecture and that on Syria with Portico Thermae and Tomb may seem to complete fairly well especially if Masonry Vaulting and the like be looked up the presentation of what is known on the general subject About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

or builders *Detailing Worlds* is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building. By exploring how past meanings and roles were ascribed to detail in different worlds of practice—those of academics, technicians, students, engineers, and architects—*Detailing Worlds* looks to the future, illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time. It is a story about how such concepts are slowly but constantly reconceived, redefined, and transformed by individuals as they interact with one another and how this process is shaped by the ever-changing sociocultural and technological dimensions of the world around us. Richly illustrated with more than 200 images, including figures from rare texts, archival student drawings, and practitioners' construction documents from the 18th through 20th centuries, *Detailing Worlds* ventures to tell the history of a disciplinary-specific idea and offer insights about how we think and speak about the practice of building today.
