Desolate Landscapes Ice Age Settlement In Eastern Europe:

Desolate Landscapes John F. Hoffecker, 2002 **Landscape of the Mind** John F. Hoffecker, 2011-05-31 In *Landscape of the Mind* John F. Hoffecker explores the origin and growth of the human mind drawing on archaeology history and the fossil record He suggests that as an indirect result of bipedal locomotion early humans developed a feedback relationship among their hands brains and tools that evolved into the capacity to externalize thoughts in the form of shaped stone objects When anatomically modern humans evolved a parallel capacity to externalize thoughts as symbolic language individual brains within social groups became integrated into a neocortical Internet or super brain giving birth to the mind Noting that archaeological traces of symbolism coincide with evidence of the ability to generate novel technology Hoffecker contends that human creativity as well as higher order consciousness is a product of the superbrain He equates the subsequent growth of the mind with human history which began in Africa more than 50 000 years ago As anatomically modern humans spread across the globe adapting to a variety of climates and habitats they redesigned themselves technologically and created alternative realities through tools language and art Hoffecker connects the rise of civilization to a hierarchical reorganization of the super brain triggered by explosive population growth Subsequent human history reflects to varying degrees the suppression of the mind s creative powers by the rigid hierarchies of nationstates and empires constraining the further accumulation of knowledge The modern world emerged after 1200 from the fragments of the Roman Empire whose collapse had eliminated a central authority that could thwart innovation Hoffecker concludes with speculation about the possibility of artificial intelligence and the consequences of a mind liberated from its organic antecedents to exist in an independent nonbiological form **Human origin sites and the World Heritage Convention in Eurasia** Sanz, Nuria

(UNESCO), 2015-09-07 **Cro-Magnon** Brian Fagan, 2011-05-17 Cro Magnons were the first fully modern Europeans not only the creators of the stunning cave paintings at Lascaux and elsewhere but the most adaptable and technologically inventive people that had yet lived on earth The prolonged encounter between the Cro Magnons and the archaic Neanderthals between 45 000 and 30 000 years ago was one of the defining moments of history The Neanderthals survived for some 15 000 years in the face of the newcomers but were finally pushed aside by the Cro Magnons vastly superior intellectual abilities and cutting edge technologies What do we know about this remarkable takeover Who were these first modern Europeans and what were they like How did they manage to thrive in such an extreme environment And what legacy did they leave behind them after the cold millennia This is the story of a little known yet seminal chapter of human experience From publisher description Settlement Dynamics of the Middle Paleolithic and Middle Stone Age Nicholas John Conard, 2001 **The Evolution of Hominin Diets** Jean-Jacques Hublin, Michael P. Lillie, Inna D. Potekhina, 2020-09-30 This volume covers the Prehistory of Ukraine from the Lower Palaeolithic through to the end of the Neolithic periods This is the first comprehensive synthesis of Ukrainian Prehistory from earliest times through until the Neolithic Period undertaken by researchers who are currently investigating the Prehistory of Ukraine At present there are no other English language books on this subject that provide a current synthesis for these periods The chapters in this volume provide up to date overviews of all aspects of prehistoric culture development in Ukraine and present details of the key sites and finds for the periods studied The book includes the most recent research from all areas of prehistory up to the Neolithic period and in addition areas such as recent radiocarbon dating and its implications for culture chronology are considered as is a consideration of aDNA and the new insights into culture history this area of research affords alongside recent macrofossil studies of plant use and anthropological and stable isotope studies of diet which all combine to allow greater insights into the nature of human subsistence and cultural developments across the Palaeolithic to Neolithic periods in Ukraine It is anticipated that this book will be an invaluable resource for students of prehistory throughout Europe in providing an English language text that is written by researchers who are active in their respective fields and who possess an intimate knowledge of Ukrainian prehistory
