Despite The Odds The Contentious Politics Of Education Reform:

Despite the Odds Merilee S. Grindle, 2004-07-26 *Despite the Odds* examines five examples of education reform in South America focusing on the political battle to secure reform in the face of powerfully entrenched opposition. It shows how strategic choices by reformers can reshape power equations, undermine institutional biases. **Despite the Odds** Merilee Serrill Grindle, 2004. *Despite the Odds* examines five examples of education reform in South America focusing on the political battle to secure reform in the face of powerfully entrenched opposition. It shows how strategic choices by reformers can reshape power equations, undermine institutional biases. *The Political Economy of Educational Reforms and Capacity Development in Southeast Asia* Yasushi Hirosato, Yuto Kitamura, 2009-02-07. Yasushi Hirosato and Yuto Kitamura. Developing countries including Southeast Asian countries face an enormous challenge in ensuring equitable access to quality education in the context of deepening globalization and increasing international competition. They must simultaneously meet the goals of Education for All (EFA) at the basic education level and of developing a more sophisticated workforce required by the knowledge-based economy at the post-basic, especially tertiary education level. To meet this challenge, developing countries need to reform, renovate their education systems and service deliveries as an integral part of national development. However, most of them have not yet fully developed the individual institutional and system capacities in undertaking necessary education reforms, especially under decentralization and privatization, requiring new roles at various central and local or public and private levels of administration and stakeholders. Provided that an ultimate vision of educational development and cooperation in the twenty-first century would be to develop indigenous capacity in engineering education reforms, this book analyzes the overall education reform context and capacity, including the status of sector program support using the sector-wide approach (SWAp) program-based approach (PBA) in developing countries. We also address how different stakeholders have been interacting in order to promote equitable access to quality education, particularly from the perspectives of capacity development under the system of decentralization. **Mapping the Terrain of Education Reform** Vicente Chua Reyes, Jr., 2015-06-26. This book envisions the formulation of critical perspectives on education reform using the Philippine experience, recognizing the need to address relevant issues and challenges, particularly in an increasingly globalized twenty-first century setting. A specific education reform project, the Leaders and Educators in Asia Programme (LEAP), a joint effort between the Philippines Department of Education, the Ateneo de Manila University in the Philippines, the National Institute of Education Singapore, and Singapore's Temasek Foundation, serves as the analytical focus of how education reform as a globalized movement is implemented, interpreted, and made sense of by stakeholders involved in the reform project. This inquiry proposes to examine the problematique of education reform from a Philippine perspective by focusing on three analytical starting points: 1) describing the most relevant and urgent issues of education reform; 2) diagnosing the causes and consequences of reform failures; and 3) developing critical and contextualized perspectives on reform trajectories. Mapping the

Terrain of Education Reforms Global trends and local responses in the Philippines discusses the following Challenges against effective education reforms The oscillation between global and local imperatives The dissociation between policymakers and practitioners Education reform aid in the Philippines This book will be of interest to researchers interested in education policy politics and reforms It will also appeal to scholars examining Asian and particularly Southeast Asian educational systems

Analyzing the Distributional Impact of Reforms: A practitioner's guide to trade, monetary and exchange rate policy, utility provision, agricultural markets, land policy, and education World Bank, 2005 This publication is a practitioner's guide for analyzing the distributional impact of reforms to trade monetary and exchange rate policy utility provision agricultural markets land policy and education These six areas of policy reform are the ones most likely to have an impact on distribution and poverty Such analysis helps in policy formulation and development and for implementing poverty reduction strategies in developing countries Each chapter in this volume provides an overview and guidance on the specific issues arising in the analysis of the distributional impacts of policy and institutional reforms in selected sectors

Education in Crisis Judith A. Gouwens, 2009-05-14 A description and critique of education reform in the United States since the 1950s focusing on the current condition of American schools and efforts to increase both educational opportunity and overall excellence Authoritative and objective Education in Crisis A Reference Handbook is a critical look at the current state of the American school system the conditions that have led many to label it in crisis and solutions aimed at leveling the educational playing field elevating overall student achievement and keeping American students competitive on the world stage Education in Crisis shows how competing economic political philosophical psychological and global interests have influenced American education reform It then covers a range of reform initiatives including magnet schools basic skills curriculum home schooling and the role of technology A comparison of the U S education system to those of other countries and a presentation of helpful resources round out this essential volume for educators policymakers parents and anyone concerned about the nation's schools

Dire Straits-Education Reforms Montserrat Gomendio, José Ignacio Wert, 2023-02-14 Responding to an educational emergency generated largely by the difficulties of implementing education reforms this book compares education policies around the world in order to understand what works where To address the key question of why education reforms are so difficult the authors take into account a broad range of relevant factors such as governance ideology and stakeholder conflicts of interest and their interactions with one another Drawing on their experiences as policymakers in the Spanish government and as governmental advisors worldwide Montserrat Gomendio and Jose Ignacio Wert produce a publication like no other shifting the usual Eurocentric narrative and shedding light on frequently overlooked educational policies from elsewhere In this context they dive deeper into details of educational failures and successes the processes of implementation and investment priorities in different countries They provide revealing accounts of stakeholder conflicts of interest and the challenges of implementing educational reform during a financial crisis The authors also

investigate why the evidence from international large scale assessments ILSAs has contrary to expectation not generated improvements in most education systems Gomendio and Wert investigate the evolution of different education systems closely examining their advances or declines Gomendio and Wert s expert voices illuminate the current state of global education systems and the necessary changes to ensure long awaited improvements This is a revelatory and informative resource for policymakers teachers and academics alike Working with the Grain Brian Levy,2014 The development discourse has long been dominated by best practices prescriptions for reform but these are not a useful way of responding to the governance ambiguities of the early 21st century Working with the Grain draws on both innovative scholarship and Brian Levy s quarter century of experience at the World Bank to lay out an alternative a practical analytically grounded with the grain approach to reducing poverty and addressing weaknesses in governance Best practice prescriptions confuse the goals of development with the journey of getting from here to there A strong rule of law capable and accountable governments and a flexible level playing field business environment are indeed desirable end points But the ability to describe well governed states does not conjure them into existence If the only available actions are all or nothing then efforts at change will almost certainly fall short leading to disillusion and despair By contrast this book takes as its point of departure the realities of a country s economy polity and society and directs attention towards the challenges of initiating and sustaining forward development momentum The book distinguishes among four broad groups of countries according to whether polities are dominant or competitive and whether institutions are personalized or impersonal identifies alternative options for governance and policy reform top down options which endeavor to strengthen formal institutions and options supporting the emergence of islands of effectiveness explores how to identify entry points for change where there is a good fit between divergent country contexts and alternative options for reform Sometimes the binding constraint to forward movement can be institutional making governance reform the priority at other times the priority can better be on inclusive growth Taking the decade or so time horizon of practitioners the aim is to nudge things along seeking gains that initially may seem quite modest but sometimes can give rise to a cascading sequence of change for the better *Citizens, Politicians, and Providers* Ariel Fiszbein,2005-01-01 This document aims to provide guidance to policymakers and development practitioners on how to shape public action to get better quality services for all in Latin America Latin American countries have seen significant progress in the last 20 years in the coverage of social and infrastructure services However coverage gaps and poor quality of services remain a serious problem for many citizens particularly the poor While technical difficulties may still be a constraint for some sophisticated services they are clearly not a difficulty for the most essential ones Understanding questions of access and quality of services is about the behaviors of people from teachers to administrators politicians and rich and poor citizens The main concern is whether those responsible for designing and delivering services are accountable to the citizens who are demanding the services and also paying the taxes and fees that finance these services ReVista ,2004 Education

Reforms and Teachers' Unions Denise Vaillant, 2005 This publication examines the situation of teachers unions in Latin America and their role in the implementation of recent education reforms It highlights the importance of collaboration between policy makers and unions and makes relevant recommendations While significant progress has been made in terms of educational coverage ensuring the quality of the education imparted remains a priority and depends largely on teachers more particularly on their knowledge methods and motivation A major concern of planners managers and decision makers is to establish a better understanding of teachers unions and to work with them as closely as possible The booklet describes how teachers unions in Latin America operate and discusses their foremost preoccupations as well as presenting some strategies to appease conflicts and potential solutions to current problems Examen Parcial Manuel E. Accounting for the Changing Educational Achievement of Mexican Youth Between 1984 and 2000 León Fernández Bujanda, 2006 **From Schooling Access to Learning Outcomes, an Unfinished Agenda** H. Dean Nielsen, World Bank. Independent Evaluation Group, 2006 In developing countries over the past 15 years high priority was accorded to increasing enrolments in primary schools but much less attention was directed to

whether children were learning adequately Of the primary education projects funded by the World Bank only 20 percent have an explicit objective to help children improve learning outcomes including such basic skills as reading and writing Some 90 percent of the projects support quality improvements usually in terms of better educational inputs such as books and teacher training but only about 35 percent target and track improved student learning as made evident by for example better reading writing and mathematical skills For the evaluation IEG reviewed over 700 primary education projects from 1990 onward According to IEG 69 percent of World Bank projects designed to improve access to education succeeded in achieving their expansion goals Enrolment expansion has generally come through supply side interventions such as new schools and classrooms within easy walking distance hiring more teachers and activating community support Governments have also increased demand by eliminating school fees and providing girls scholarships The report recommends that countries the World Bank and development partners give the same emphasis to learning outcomes as to access so that the world s increasing investments in primary education have a far greater impact on poverty reduction and national development
