Destroyer German Destroyers In World War II:

German Destroyers of World War Two M. J. Whitley, 1991 The definitive study of Germany's destroyer arm throughout World War II German Destroyers of World War II Gerhard Koop, Klaus-Peter Schmolke, 2003 **German Destroyers of World War II** Gerhard Koop, Klaus-Peter Schmolke, 2014-07-22 A detailed illustrated history of the torpedo boat destroyers of the Nazi German Navy The warships of the World War II German Navy are among the most popular subjects in naval history and one of the best collections is the concise but authoritative six volume series written by Gerhard Koop and illustrated by Klaus Peter Schmolke Each book contains an account of the development of a particular class a detailed description of the ships with full technical details and an outline of their service and are heavily illustrated with plans battle maps and a substantial collection of photographs This volume in the series details the more than 40 German destroyers including captured ships that saw service during World War II Chapters range from their design and development armament and machinery to the differences in appearance camouflage schemes and modifications This book also covers the destroyers careers and the many actions they fought complemented by illustrated plans technical drawings maps and a comprehensive gallery of photographs German Destroyers 1939-45 Gordon Williamson, 2012-04-20 The German destroyer fleet of World War II consisted of nine classes the Diether Von Roeder Class the Leberecht Maas Class and the wartime classes Z23 Z35 Z37 Z40 Z43 Z46 and Z52 These vessels though fewer in number than the British destroyer fleet tended to be much bigger and more powerful than their allied counterparts They served their country well in operations in the Channel North Sea the Far North and in the rescue of civilians from East Prussia during the final days of the war This title describes their design development and operational use from the fjords of Narvik to the final days of the war **British Destroyer vs German Destroyer** David Greentree, David Campbell, 2018-10-18 The opening months of World War II saw Britain's Royal Navy facing a resurgent German navy the Kriegsmarine Following the German invasion of Denmark and Norway in early April 1940 British and German destroyers would clash in a series of battles for control of the Norwegian coast The operational environment was especially challenging with destroyer crews having to contend with variable weather narrow coastal tracts and possibility of fog and ship breakdowns In two engagements at Narvik the Royal Navy entered the harbour and attacked the loitering German destroyers who had dropped off mountain troops to support the German invasion The raids were devastating halving at a stroke the number at Hitler's disposal Employing specially commissioned artwork and drawing upon a range of sources this absorbing study traces the evolving technology and tactics employed by the British and German destroyer forces and assesses the impact of the Narvik clashes on both sides subsequent development and deployment of destroyers in a range of roles across the world's oceans **World War II Sea War, Volume 3: The Royal Navy is Bloodied in the Mediterranean** Donald A Bertke, Gordon Smith, Don Kindell, 2012-05-15 Day to day naval actions from October 1940 through May 1941 Provides detailed information on movements of all identifiable vessels of Allied Axis and

neutral countries plus convoy movements and minefields Information is broken down by month then by geographical area date and time This series is an invaluable source for historians students and anyone interested in the naval history of World War II *The German Navy in World War II* Robert Jackson,1999 Hitler s navy is examined in detail from the small coastal vessels to the giant battleships with full colour illustrations of all the major types of vessel Accounts of the most important naval actions are included *WORLD WAR II SEA WAR: FRANCE FALLS, BRITAIN STANDS ALONE: Day-to-Day Naval Actions from April 1940 through September 1940* Donald A. Bertke,Don Kindell,Gordon Smith,2011-07-31 Day to Day Naval Actions April 1940 through September 1940 *The German Destroyer Z37* Carlo Cestra,2018-03-13 **Kriegsmarine** Robert Jackson,2001 Covering all classes of vessel and all theatres of war from the sorties into the Atlantic by the capital ships Bismarck Tirpitz Scharnhorst and Gneisenau to the actions of the E boats in the English Channel and the Mediterranean **World War Two in Europe** David T. Zabecki,1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **Hitler's Jewish Soldiers** Bryan Mark Rigg,2002 On the murderous road to racial purity Hitler encountered unexpected detours largely due to his own crazed views and inconsistent policies regarding Jewish identity After centuries of Jewish assimilation and intermarriage in German society he discovered that eliminating Jews from the rest of the population was more difficult than he d anticipated As Bryan Rigg shows in this provocative new study nowhere was that heinous process more fraught with contradiction and confusion than in the German military Contrary to conventional views Rigg reveals that a startlingly large number of German military men were classified by the Nazis as Jews or partial Jews Mischlinge in the wake of racial laws first enacted in the mid 1930s Rigg demonstrates that the actual number was much higher than previously thought perhaps as many as 150 000 men including decorated veterans and high ranking officers even generals and admirals As Rigg fully documents for the first time a great many of these men did not even consider themselves Jewish and had embraced the military as a way of life and as devoted patriots eager to serve a revived German nation In turn they had been embraced by the Wehrmacht which prior to Hitler had given little thought to the race of these men but which was now forced to look deeply into the ancestry of its soldiers The process of investigation and removal however was marred by a highly inconsistent application of Nazi law Numerous exemptions were made in order to allow a soldier to stay within the ranks or to spare a soldier s parent spouse or other relative from incarceration or far worse Hitler s own signature can be found on many of these exemption orders But as the war dragged on Nazi politics came to trump military logic even in the face of the Wehrmacht s growing manpower needs closing legal loopholes and making it virtually impossible for these soldiers to escape the fate of millions of other victims of the Third Reich Based on a deep and wide ranging research in archival and secondary sources as well as extensive interviews with more than four hundred Mischlinge and their relatives Rigg s study breaks truly new ground in a crowded field and shows from yet another angle the extremely flawed dishonest demeaning and tragic essence of Hitler s rule *The German Navy in World War Two* Jak P. Showell,1979 Tin Cans and Greyhounds Clint Johnson,2019-02-12 Mr Johnson has produced a technical history of destroyers as all around naval weapons Anyone interested in these ships will value his efforts The Wall Street Journal A well written and enjoyable history of destroyer class warships filled with memorable sea battles in which destroyers played prominent roles Publishers Weekly For men on destroyer class warships during World War I and World War II battles were waged against overwhelming odds from which survival could not be expected Those were the words Lieutenant Commander Robert Copeland calmly told his crew as their tiny unarmored destroyer escort rushed toward giant armored Japanese battleships at the Battle off Samar on October 25 1944 This action packed narrative history of destroyer class ships brings readers inside the half inch thick hulls to meet the men who fired the ships guns torpedoes hedgehogs and depth charges Nicknamed tin cans or greyhounds destroyers were fast escort and attack ships that proved indispensable to America s military victories Beginning with destroyers first incarnation as torpedo boats in 1874 and ending with World War II author Clint Johnson shares the riveting stories of the Destroyer Men who fought from inside a tin can risking death by cannons bombs torpedoes fire and drowning The British invented destroyers the Japanese improved them and the Germans failed miserably with them It was the Americans who perfected destroyers as the best fighting ship in two world wars Tin Cans Greyhounds compares the designs of these countries with focus on the old modified World War I destroyers and the new and numerous World War II destroyers of the United States Tin Cans Greyhounds details how destroyers fought submarines escorted convoys rescued sailors and airmen downed aircraft shelled beaches and attacked armored battleships and cruisers with nothing more than a half inch of steel separating their crews from the dark waves British Fiji Class Cruisers and their Derivatives Conrad Waters,2024-05-30 A follow up to the author s highly regarded history of British Town class cruisers this book takes the same approach combining coverage of the development design details and career highlights of the original class as well as the Uganda Minotaur and Tiger designs that were derived from them Often called the Colony class they were an attempt to incorporate the characteristics of the preceding Town class within the reduced 8 000 ton limit agreed under the 1936 London Treaty In general layout they resembled the earlier class but adopted upright rather than raked funnels and masts The use of a flat transom stern conferred both hydrodynamic and internal space advantages Not surprisingly they turned out to be very cramped ships which struggled to accommodate all the wartime additions of extra electronics and light AA guns as well as the increased crew needed to man them Many of the later modifications to existing ships and alterations to the succeeding designs were attempts to alleviate these issues most visibly the reduction of the main armament from four to three turrets Nevertheless they were available in significant numbers and gave sterling service across all theaters of the naval war In this major study Conrad Waters makes extensive use of archive material to provide a technical evaluation of the Fiji class design and its subsequent performance He outlines the class s origins in the context of inter war cruiser policy explains the design and construction process and describes the characteristics of the resulting ships

and how these were adapted in the light of wartime developments An overview of service focuses on major engagements assessing the extent to which the class met its designers expectations and detailing the consequences of action damage Later chapters continue the story into the Cold War era examining the various post war modernization programs and concluding with the radical redesign of the Tiger class that produced the Royal Navy s last conventional cruisers Heavily illustrated with contemporary photographs original plans and drawings by Dave Baker John Jordan and George Richardson British Fiji Class Cruisers provides a definitive reference to one of the Royal Navy s most important Second World War warship designs
