Detergency Of Specialty Surfactants:

Detergency of Specialty Surfactants Floyd Friedli, 2001-02-07 This volume seeks to advance cost effective methods using newly developed surfactants It summarizes data from physical chemical surface detergency cleaning toxicity and environmental sources for designing new formulations of classic organic head tail surfactants in response to increased environmental toxicity safety and performance demands Handbook of Detergents, Part D Michael Showell, 2016-04-19 Beyond use in the consumer markets detergents affect applications ranging from automotive lubricants to remediation techniques for oil spills and other environmental contaminants paper and textile processing and the formulation of paints inks and colorants Faced with many challenges and choices formulators must choose the composition of detergents **Handbook of Detergents - 6 Volume Set** Uri Zoller, 2008-11-23 With contributions from experts and pioneers this set provides readers with the tools they need to answer the need for sustainable development faced by the industry The six volumes constitute a shift from the traditional mostly theoretical focus of most resources to the practical application of advances in research and development With contributions from Proceedings of the 4th World Conference on Detergents Arno Cahn, 1999-05-30 These proceedings document a conference that has become the forum not only for the dissemination of new technical developments reviews of markets and consumer habits across the globe but also for communicating policy by the major players in the industry *Handbook Of Detergents, Part C* Heinrich Waldhoff, Rudiger Spilker, 2016-04-19 The scope and spectrum of methods and techniques applied in detergent analysis have changed significantly during the last decade Handbook of Detergents Part C Analysis demonstrates state of the art strategies methods and techniques for the analytical reformulation of modern detergents It offers a comprehensive view of all aspects of detergent analysis *McCutcheon's Emulsifiers & Detergents*, 2004 **Proceedings of the 3rd World Conference on Detergents** Arno Cahn, 1994-01-30 This book contains plenary papers and selected poster presentations from the AOCS sponsored World Conference held in Montreux Switzerland *McCutcheon's Detergents & Emulsifiers*, 1978 Chemicalweek, 1998 Oils, Detergents, and Maintenance Specialties: Materials and processes Benjamin Levitt, 1967 CONTENTS 1 INTRODUCTION 2 ANIMAL FATS AND OILS 3 VEGETABLE FATS AND OILS 4 FATTY ACIDS FATTY ALCOHOLS GLYCEROL 5 SURFACTANTS AND SURFACE ACTIVITY 6 PRODUCTION OF FATS AND OILS 7 SOAP MANUFACTURE 8 SYNTHETIC DETERGENTS 9 ANALYSIS OF OILS AND DETERGENTS INDEX Preface Presented in this book are quantities of data gathered during many years in my practice of chemistry either as resident chemist in manufacturing plants or as a consultant to the soap and related industries The style is didactic and such that it may readily be understood by non technical personnel Involved theoretical and technical discussions have been avoided As far as possible references have been included at the end of each chapter Although much of the information contained in this work is well within my own experience much of it has been gleaned also from manufacturers technical bulletins or through private correspondence Many patents have been cited merely as examples of products

discussed this is not to be construed as recommending the infringement of any such patents The various formulations are presented in good faith but no warranty is given nor is freedom from any patent to be inferred With a little ingenuity on the part of the reader many useful and efficient products may be made along the lines discussed without in any way infringing on patented products Because of numerous factors affecting results all the formulations cited herein although believed to be reliable most of them having emanated from the greatest laboratories in the world should be tested thoroughly It is especially recommended that manufacturers make their own tests to determine the suitability of the formulations for the specific applications intended I am indebted to the manufacturers of the many chemicals named in the book for information which I gathered either from direct correspondence or from their technical bulletins also for their many samples with which I compounded some of the formulas Special mention should be made of those companies that supplied photographs of equipment and installations depicting various processes I have tried to include all information pertinent to each formula and credit has been given to all identified suppliers so that additional information if needed may be obtained from the manufacturers of the basic materials used Finally I am grateful to the publishers for valuable assistance in the organization and presentation of my quantities of material which now comes out as not merely a second edition of my Oil Fat and Soap but as a much more comprehensive new book
