Dying and Death in Law and Medicine Arthur S. Berger, 1993 While health professionals may be adequately informed about the legal aspects of many specialized areas of medicine and nursing they may not totally understand the law applicable to cases of dying patients or even the legal definition of death itself In the wake of advances in medical technology recent court decisions on the right to die the enactment of natural death and brain death statutes advance directives and living wills and growing use of organ transplantation there has been widespread concern about the legal and ethical issues surrounding these subjects This book written by a lawyer thanatologist will satisfy these needs It is the first work to bring together case and statutory law applicable to dying patients the right to die advance directives brain death and organ transplantation thus formulating a law of dying and death It is also unique as a self help law finder Although occasions that require consultation with a lawyer will arise this work gives health professionals practical guidance on where and how to find legal materials on these issues This book should also prove immensely useful in summarizing the law concerning dying and death for professional legal counsel Medical decisions and issues that once were the sole province of doctors hospitals patients and families have become matters of increasing judicial and legislative attention *The Linacre Quarterly*, 2001 **The**

Christian Religion and Biotechnology George P. Smith, 2005-06-18 Religion is a dominant force in the lives of many Americans It animates challenges directs and shapes as well the legal political and scientific agendas of the new Age of Biotechnology In a very real way religion biomedical technology and law are epistemologically different Yet they are equal vectors of force in defining reality and approaching an understanding of it Indeed all three share a synergetic relationship for they seek to understand and improve the human condition This book strikes a rich balance between thorough analysis in the body anchored in sound references to religion law and medical scientific analysis and a strong scholarly direction in the end

notes It presents new insights into the decision making processes of the new Age of Biotechnology and shows how religion law and medical science interact in shaping directing and informing the political processes This volume will be of interest to both scholars and practitioners in the fields of religion and theology philosophy ethics family law science medicine political science and public policy and gender studies It will serve as a reference source and can be used in graduate and undergraduate courses in law medicine and religion
