The Deadly Embrace Ilana Kass, Bard O'Neill, 1997 The purpose of this book is three fold First drawing on a wide array of primary and secondary sources it aims to compare and contrast the historical roots goals strategies organizational structures and current activities of Palestinian and Israeli opponents of any mutual compromise Second the book assesses the dynamic interaction of two rejectionist movements espousing mutually exclusive political agendas and demonstrates how they feed off and reinforce each others enmities Third the book seeks to expose to public scrutiny a deeply entrenched phenomenon that has continued to lurk in the shadows while enjoying both tacit and direct support from segments within the American Arab and Jewish communities Although such recent outrages as the Hebron massacre the Rabin assassination and the spate of suicide bombings in Israel's cities have re centered attention on Middle Eastern terrorism the primary focus has been on lone actions of deranged individuals In contrast the authors contend that what we have witnessed thus far is merely the tip of the iceberg overt manifestations of a deep seated festering problem namely increasingly militant insurgent movements united in their near term aim of destroying the peace process but ultimately sworn to destroy each other The book concludes with a set of policy choices and recommendations which the U S Israel and the Palestinian National Authority should pursue in tandem to marginalize the rejectionist threat before it escalates to hitherto unimaginable levels of violence Co published with the National Institute of Public Policy Protection Pending Christian Enemark, 2000 Until recently the threat of biological weapons BW has received little international attention compared with other weapons of mass destruction WMD Concern about nuclear weapons NW and more recently about chemical weapons CW has dominated efforts in non

proliferation research and policy making Arguably the great moral abhorrence attached to BW has tended to narrow what public discussion has occurred on this sensitive topic Today the threat of BW is real and yet there is no means of knowing whether a country is in breach of the international ban on these horrific weapons This paper is premised on a determination to give the problem of BW proliferation the attention it deserves A mere description of the threat of BW will not suffice This work sets out to investigate an important means by which the threat to global security posed by BW could be substantially reduced the conclusion of a workable verification Protocol to strengthen the Biological Weapons Convention BWC ACDIS website [Strategic Forum](#) ,1994 日本国政府 Japan.
