Deterrence And The New Global Security Environment:

Deterrence and the New Global Security Environment Ian R. Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies Strategy in the Contemporary World John Baylis, James J. Wirtz, Colin S. Gray, 2013 The fourth edition of this successful textbook has been revised and updated in light of recent events and includes a new chapter on the rise of cyberpower Its comprehensive coverage of issues of war and peace such as terrorism intelligence and weapons of mass destruction makes it the major strategic studies textbook in the field

Educating International Security Practitioners: Preparing to Face the Demands of the 21st Century
International Security Environment James M. Smith, 2001 The authors examine the challenges of the 21st century international security environment to which future strategic leaders and policy practitioners will need to respond More specifically they offer the reader insights into security studies and leadership development at their respective levels military undergraduate civilian undergraduate traditional and nontraditional graduate and senior military officer and institutions including research centers and professional outreach programs The goal is to inform a broader audience about what is currently being done in the way of educating strategic practitioners at these various institutions and what might need to be done differently or better A Nuclear Weapons-Free World? Nick Ritchie, 2012-10-29 President Obama and the UK Labour and Coalition governments have all backed the renewed momentum for serious progress towards a world free of nuclear weapons whilst the UK finds itself embarked on a controversial and expensive programme to renew its Trident nuclear weapons system What does the UK process tell about the prospects for disarmament *US Arms Control and International Security Policy Handbook: Strategic Information and Developments* IBP USA, 2009-03-30 *US Arms Control and International Security Policy Handbook* *Handbook of Nuclear Proliferation* Harsh V Pant, 2012-02-27 The chapters of this proposed volume are intended to shed light on the diverse themes surrounding this very important issue area in international security Each of the six major sections addresses an aspect of nuclear proliferation that will be critical in determining the future trajectory of global politics in the years to come The first section examines the major thematic issues underlying the contemporary discourse on nuclear proliferation How do we understand this period in proliferation What accounts for a taboo on the use of nuclear weapons so far and will it survive What is the present state of nuclear deterrence models built during the Cold War What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation Why

are we witnessing a move away from non proliferation to counter proliferation The second section gives an overview of the evolving nuclear policies of the five established nuclear powers the USA Russia the United Kingdom France and the People s Republic of China Section three looks at the three de facto nuclear states India Pakistan and Israel The fourth section examines the three problem areas in the proliferation matrix today Iran North Korea and the potent mix of non state actors and nuclear weapons The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state The cases of South Africa Egypt and Japan will be the focus of this section The final section will examine the present state of the global nuclear non proliferation regime which most observers agree is currently facing a crisis of credibility The three pillars of this regime the Nuclear Non Proliferation Treaty NPT the Comprehensive Test Ban Treaty CTBT and the Fissile Material Cut Off Treaty FMCT will be examined This is followed by an analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come

Principles of Global Security

John D. Steinbruner, 2000

From the earliest human records warfare has been both an organizing focus and a prime source of political motivation Countless battles have been fought in the course of colonizing the planet and the experience has created a legacy of military confrontation that many people consider immutable Since preparations for war and the occasional conduct of it have been central preoccupations for virtually all the major states throughout time it is widely assumed that the pattern is rooted in human nature and will endure indefinitely But contemporary civilization is undergoing a monumental transformation affecting its most basic features The combined effects of information technology population dynamics and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction Correspondingly fundamental

changes in the practice of war or what is now more politely called international security can be expected to follow Principles of Global Security anticipates the major implications of this massive transformation for security policy John D Steinbruner one of the nation s leading specialists on defense issues identifies formative problems and organizing principles relating to the predictable issues of security He examines in sequence how the configuration of nuclear and conventional forces might be affected how the problems of communal violence and dangers of technical proliferation might be managed and how security relationships among the major states might be altered One of the fundamental implications of globalization in a post cold war environment is a shift in security policy from deterrence to reassurance from active confrontation to cooperative engagement Without an opponent to justify preparation for large scale traditional missions nations must establish safer and less volatile patterns of deployment Maintaining global security in the twenty first century calls for a reconfiguration of basic relationships among historical opponents as well as revisions in military practices This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security

Strategic Culture and Weapons of Mass Destruction Jeannie L. Johnson,Kerry M. Kartchner,Jeffrey A. Larsen,2009-02-13 Interest in reviving strategic culture as a field of study results from the inadequacy of traditional analytical approaches and calls to develop a new framework to guide policymaking in the post 9 11 security environment The book considers 10 case studies of WMD decision making profiling culture in terms of geography shared narratives group relationships threat perception ideology religion economics leadership style and more Strategic culture can help us more accurately evaluate intelligence regarding dangers emanating from other cultures and improve our strategic communications A strategic cultural perspective makes us appreciate the requirements for promoting U S global responsibilities in a multi cultural context negotiate across cultures more effectively and forecast the implications of cultural change for strategic planning purposes

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley,Mitsuru Kurosawa,Kazumi Mizumoto,2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament
