National Defense University,1997* **Deterrence Theory: Success Or Failure in Arab-Israeli Wars?** Elli Lieberman,2012-07-09 Rational deterrence theory provides scholars with an explanatory framework which specifies the requirements for the success and failure of deterrence In this book the success or failure of the deterrence theory in the Arab Israeli wars *Israel's Wars of Attrition* Avi Kober,2009-09-11 This book analyzes the way Israel has coped with nine wars of attrition from the 1950s to the recent Second Lebanon War 2006 questioning the belief that Western democracy cannot sustain prolonged wars of attrition Challenging Israel with attrition has been compatible with the Arab way of war which emphasizes staying power and with the belief that democracies cannot tolerate wars of attrition either economically or psychologically Israel for its part developed a self image of incapacity to sustain prolonged wars committing itself to a traditional offensive approach to blitzkrieg whenever possible The book offers an account of nine wars of attrition that Israel was involved in over almost 60 years from Palestinian infiltration and fedayeen activities against Israel in the early 1950s through to the Second Lebanon War in 2006 The author uses these cases to challenge the myth that Israel cannot afford to become involved in a draining war of attrition Focusing on

central aspects typical of Western democracies engaged in wars of attrition operational effectiveness the societal staying power the economic burden of the war moral dilemmas and conflict management problems the book challenges the myth that Israel cannot afford to become involved in a draining war of attrition while at the same time highlighting the fact that in its wars of attrition Israel has not always succeeded in avoiding undesired escalation This book will be of much interest to students of strategic studies Israeli history Middle Eastern politics and security studies in general Avi Kober is a member of the Department of Political Studies at Bar Ilan University Israel and is a Senior Research associate with the BESA Center for Strategic Studies

Parameters, 1997 Deterrence and Defense in a Nuclear, Biological, and Chemical Environment Robert G. Joseph, John F. Reichart, 1999 It is a paradox of the present security environment that at a time when the United States has renounced the possession of offensive biological and chemical weapons and is reducing fundamentally the role of nuclear weapons in its defense posture a number of actors are actively pursuing such weapons These include not only rogue states such as North Korea and Iran but also nonstate actors such as the Aum Shinrikyo cult that employed sarin gas in the Tokyo subway Moreover as the May 1998 nuclear tests in India and Pakistan demonstrated the value ascribed to these weapons in some regions of the world is actually increasing In fact as evidenced by the use of chemical weapons in recent conflicts despite the strengthening of international legal norms against the possession of NBC weapons barriers to possession and use may actually be eroding For these reasons NBC proliferation represents a growing and direct threat to U S security strategy and to the ability of the United States to use military force as an instrument of that strategy The intelligence community has published various assessments of more than two dozen countries that are actively pursuing NBC weapons programs and has identified many of these states as currently possessing or seeking ballistic missiles with ever longer ranges The Department of Defense report Proliferation Threat and Response presents an equally troubling vision of the proliferation threat Congressional publications including The Proliferation Primer released by the Senate Committee on Governmental Affairs make clear that the profound security implications stemming from NBC and missile proliferation are shared by both the executive and legislative branches
