Deutsche Autos 1920-1945:

The German Autobahn, 1920-1945 Richard Vahrenkamp, 2010 The expressway network in Europe developed into an essential infrastructure of the 20th and the beginning of the 21st century and provided means of commuting as well as accommodated leisure travel and the cargo supply for the mass consumption society This book discusses how expressways were developed in Europe in the 1920s and 1930s It focuses on the various forerunner projects and the role of the Hafraba association which has been significant in the Hessian region with its actors in Kassel Frankfurt and Darmstadt It is shown how the Autobahn concept developed from the Italian expressways to the Bonn Cologne Autobahn and to the design of the Nazi Autobahn project The Bonn Cologne Autobahn was the first Autobahn in Germany opened in 1932 by Konrad Adenauer later Chancellor of West Germany This Autobahn section is here explored for the first time As part of the Nazi Mega Project various regional legs are explored and for the first time drawn to scholarly attention The leg Frankfurt Kassel G ttingen the leg Frankfurt Darmstadt Heidelberg Karlsruhe and the leg Munich Salzburg The goals of the Nazi mega project are evaluated Further the book shows how traffic on the Autobahn developed and which experiences were made by driving on the Autobahn The book discusses various approaches towards a theory on infrastructure The European Automobile Industry

James Michael Laux, 1992 Laux carefully examines how European factory owners emulated American success in production and sales between the wars how the postwar market boom chipped away at American dominance of the industry and how Japanese models in turn began to cut into the world market in the competitive 1980s In this incisive overview Laux determines that Europe s most successful automaking firms were generally those which identified a market and offered this market a product at a reasonable price *Subject Catalog* Library of Congress, 1978 **Automobile Quarterly**, 2003

multinational firms with a series of complex and for the most part unwelcome choices This volume which includes essays by noted American and European scholars such as Mira Wilkins Gerald Feldman Peter Hayes and Wilfried Feldenkirchen sets business activity in its political and social context and describes some of the strategic and tactical responses of firms investing from or into Europe to a myriad of opportunities and risks posed by host or home country authoritarian governments during the interwar period Although principally a work of history it puts into perspective some commercial dilemmas with which practitioners and business theorists must still unfortunately grapple **Subject Catalog, 1978** Library of Congress,1978 **Automobilities** Mike Featherstone,Nigel Thrift,John Urry,2005-07-12 Mobility flows movement and migration in social life has emerged as a central area of sociological debate yet one of its most dominant forms automobility has remained largely ignored Edited by three leading social analysts Automobilities presents one of the first and most wide ranging examinations of the car and its promise of autonomy and mobility Drawing on rich empirical detail from ethnographies of office work on the motorway to the important of the car in French cultural theory the contributions demonstrate just how significant have been the economic technological social and political consequences of a pervasive and accelerating culture of the car A broad array of theories are put to work to illuminate this vast and yet neglected topic strategy and tactics complexity theory performativity actor network theory film theory material culture theories of non places embodiment sensuous geography sociology ethnomethodology and non representational theory This book will firmly establish automobilities as a key topic for theory and research Automobilities represents a landmark text that will contribute to and provide a significant impetus for the emerging analysis of mobilities in contemporary societies
