Moving book history in a new direction this study examines publishers as brokers of Central Europe s political public sphere  
They created international print markets translated new texts launched new journals supported outspoken authors and  
experimented with popular formats Most of all they contested censorship with finesse and resolve thereby undermining the  
aim of Prussia and Austria to criminalize democratic thought By packaging dissent through popular media publishers  
cultivated broad readerships promoted political literacy and refashioned citizenship ideals As political actors intellectual  
midwives and cultural mediators publishers speak to a broad range of scholarly interests Their outsize personalities their  
entrepreneurial zeal and their publishing achievements portray how print markets shaped the political world The narrow  
perimeters of political communication in the late absolutist states of Prussia and Austria curtailed the open market of ideas  
The publishing industry contested this information order working both within and outside legal parameters to create a  
modern public sphere Their expansion of print markets their cat and mouse game with censors and their ingenuity in  
packaging political commentary sheds light on the production and reception of dissent Against the backdrop of censorship  
and police surveillance the successes and failures of these citizens of print tell us much about nineteenth century civil society  
and Central Europe s tortuous pathway to political modernization Cutting across a range of disciplines this study will engage  
social and political historians as well as scholars of publishing literary criticism cultural studies translation and the public

sphere The history of Central Europe s print markets between Napoleon and the era of unification doubles as a political tale It sheds important new light on political communication and how publishers exposed German language readers to the Age of Democratic Revolution
