The Alzheimer's Solution Dean Sherzai,Ayesha Sherzai,2017-09-12 A revolutionary proven program for reversing the symptoms of Alzheimer s disease and cognitive decline from award winning neurologists and codirectors of the Brain Health and Alzheimer s Prevention Program at Loma Linda University Medical Center Over 47 million people are currently living with Alzheimer s disease worldwide While all other major diseases are in decline deaths from Alzheimer s have increased radically What you or your loved ones don t yet know is that 90 percent of Alzheimer s cases can be prevented Based on the largest clinical and observational study to date neurologists and codirectors of the Brain Health and Alzheimer s Prevention Program at Loma Linda University Medical Center Drs Dean and Ayesha Sherzai offer in The Alzheimer s Solution the first comprehensive program for preventing Alzheimer s disease and improving cognitive function Alzheimer s

disease isn't a genetic inevitability and a diagnosis does not need to come with a death sentence. Ninety percent of grandparents, parents, husbands, and wives can be spared. Ninety percent of us can avoid ever getting Alzheimer's, and for the 10 percent with strong genetic risk for cognitive decline, the disease can be delayed by ten to fifteen years. This isn't an estimate or wishful thinking; it's a percentage based on rigorous science and the remarkable results the Sherzais have seen firsthand in their clinic. This much-needed revolutionary book reveals how the brain is a living universe directly influenced by nutrition, exercise, stress, sleep, and engagement. In other words, what you feed it, how you treat it, when you challenge it, and the ways in which you allow it to rest. These factors are the pillars of the groundbreaking program you'll find in these pages, which features a personalized assessment for evaluating risk, a five-part program for prevention and symptom reversal, and day-by-day guides for optimizing cognitive function. You can prevent Alzheimer's disease from affecting you, your family, friends, and loved ones. Even with a diagnosis, you can reverse cognitive decline and add vibrant years to your life. The future of your brain is finally within your control.

Developing a New Heart Bernard Jensen, 1995-10-01 **Nutrition and Lifestyle** International Agency for Research on Cancer, 2002. The search for the links between diet, nutritional and metabolic factors, and cancer aetiology is an area of research which over the past two decades has attracted increasing attention both from a scientific and a public health point of view. In this context, the Europe Against Cancer Program has supported the European Prospective Investigation into Cancer and Nutrition (EPIC), a study involving about half a million volunteers in 10 European countries. This book, derived from the European Conference on Nutrition and Cancer (IARC Lyon 2001) with the support of the Directorate General for Public Health and Consumer Protection of the EU, gives an update of recent scientific developments in the field. It examines the relationship between nutrition and cancer with a multidisciplinary and multifactorial approach encompassing nutritional research, endocrinology, carcinogenesis, molecular biology, and genetics.

Nutrition and Development, 1992 Assesses the nature and the magnitude of the nutritional problems in both developing and developed countries. It also analyses the causal factors under three categories of food, health and care and considers the broader policies and programmes which have an impact on the nutritional well being of the population. It considers possible lines of actions and basic strategies which need to be implemented primarily at the country level with the active support of all concerned in order to bring food security and health within the reach of all.
