Little, 2024-06-13 Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island wide in myriad communities, schools, classrooms and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians and members of local, national and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere, through an understanding of national political, economic and social conditions, crises and upheavals, through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values and means of development.
