Developing Gestalt Counselling:

Developing Gestalt Counselling Jennifer Mackewn, 1997-08-28 In this eminently sensible practical and thought provoking book Jennifer Mackewn takes gestalt light years forward towards a synthesis and integration of psychological styles and away from what she describes as Perlimism I agree with her this is a book for therapists not principally for gestaltists In inviting the reader to pick and choose from the many and varied always practical hands on approach chapters Jennifer Mackewn hopes we will both enjoy her book and find it of use This reader commending the book to you all has no doubt that both her hopes will be fulfilled Self understanding the client s context the dialogic relationship contact and awareness exploring life themes and support systems and experimental and creative methods Developing Gestalt Counselling Jennifer Mackewn, 19?? This volume contains 30 useful hints and reminders to help both students and professionals in counselling examine and improve key areas of their work Developing Gestalt Counselling encourages counsellors to focus on areas that they feel need special attention by covering topics such as relationship and dialogue assessment in the Gestalt approach contact awareness proactivity and responsibility and experimental and creative methods **Value Functions for Environmental Management** E. Beinart, 1997-06-30 Environmental decisions must satisfy a multitude of objectives and the matching of a plan policy or project to such objectives is a matter of both facts and value judgements Value Functions for Environmental Management provides a systematic approach to the structuring and measurement of value judgements showing how they drive the decision process and how to make them transparent and effective in support of complex decisions The value functions that the book describes provide a scheme for the exploration of human values and a tool for transforming them into an analytical model A clear statement can then be made of the degree to which a decision has achieved its objectives and how conflicting objectives may be addressed This does not mean that there is no role for human judgement in the process Complexity often coupled with large information gaps necessitates expert judgement but the values adopted by the experts are themselves capable of being structured and measured according to the value function methodology presented here even if the judgements themselves are qualitative and tentative Value models for expert panels are also presented The use of the methodology in practice is illustrated by examples The book contains an extensive subject index Introduction to Counselling and Psychotherapy Stephen Palmer, 2000-01-28 Stephen Palmer is joint award winner of the Annual Counselling Psychology Award for outstanding professional and scientific contribution to Counselling Psychology in Britain for 2000 An Introductory Text that applies a down to earth approach to a diversity of 23 therapeutic approaches within counselling and psychotherapy it was actually a pleasure conducting the review and having to read over the outlined models It is a definite entry for counselling training courses and will offer plenty of ideas for those teaching as well as training It is fun to read and offers numerous ideas of how to put into place counselling techniques Counselling Psychology Review This essential guide to *Gestalt Therapy for Addictive and Self-Medicating Behaviors* Philip Brownell, 2011-12-20
