Developing Observation Skills Carol A. Cartwright, Glen Phillip Cartwright, 1984 The Classroom Observer Ann E. Boehm, 1977 Classroom Observer Ann E. Boehm, Richard A. Weinberg, 1997 Systematic observation is essential for educators to evaluate properly the effectiveness of curricula and to address the problems of individual students This new third edition emphasizes early childhood and focuses on those skills that will enable the observer to make appropriate valid inferences and to arrive at decisions based on objective observation data gathered in natural learning environments and diverse educational settings Includes new focuses on Procedures for observing environmental factors that affect learning and behavior The importance of understanding the cultural and linguistic characteristics of children s learning environments The key role of observation in the assessment process The forms of observation with illustrative examples The exploration of reliability sampling behavior recording formats summarizing observational outcomes and validity Using photographs sample worksheets a simple format and straight forward language the authors cite fascinating real life examples from early childhood that can be applied to a variety of classroom experiences The Classroom Observer provides the foundation for learning how to watch children in systematic and child focused ways The authors make the critical and often underappreciated point that keen insight into children s development may be learned and that while many early childhood educators already watch children much can be gained from systematic observation I believe that this book provides a basis for critical reflection upon one s own observation skills From the Foreword by Jeanne Brooks Gunn **Developing Observation Skills** Nadine Mathis, Institute of Human Development, Central Arizona College, 1985 **The Classroom Observer** Ann E. together a range of contributions from practitioners and social work academics in order to discuss the application of ideas about observation to social work education and practice While the Tavistock Model remains influential the writers draw on material from a number of other disciplines such as behavioural ethnography psychology and critical social policy on observation and social work The central theme of the book is that of power relations The authors focus on power in relation to the process of observation and how observation can be used to counteract oppressive and dehumanising practices Clearly and perceptively written the book develops the debate on the purposes of observation and provides an overview of current practice It will be of use to students and professionals alike
