the influential roles that women and gender power relations have wielded in determining the course of international history. From the early 20th century onward, women have participated in state to state relations and decisions about when to pursue diplomacy or when to go to war to settle international conflicts. Particular women as well as masculine and feminine gender role constructs have also influenced the establishment and evolution of intergovernmental organizations and their political, social, and economic policy making regimes and agencies. Additionally, feminists have critiqued male dominated diplomatic establishment and intergovernmental organizations and have proposed alternative theories and practices. This text integrates women and gender and feminist analyses into the study of international history in order to produce a broader understanding of processes of international change during the 20th and 21st centuries.

Scholars, Policymakers, and International Affairs Abraham F. Lowenthal, Mariano E. Bertucci, 2014-11-24. *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy. Drawing on contributions from top international scholars with policy experience as well as senior policymakers, Abraham F. Lowenthal and Mariano E. Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process. Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality. Many policymakers believe that scholars are absorbed in abstract and self-referential debates and that they are primarily focused on crafting theories rather than developing solutions to pressing policy issues. The book's contributors discuss how these obstacles can be overcome. Case studies illustrate how scholars have helped reduce income inequality, promote democratic governance, and enhance inter-American cooperation. These success stories are balanced by studies on why academic analysts have had little positive impact on counternarcotics and citizen security policies. The conclusion identifies best practices and provides concrete recommendations.

Book jacket *Women, Poverty, Equality* Meghan Campbell, 2018-02-08. The stark reality is that throughout the world, women disproportionately live in poverty. This indicates that gender can both cause and perpetuate poverty, but this is a complex and cross-cutting relationship. The full enjoyment of human rights is routinely denied to women who live in poverty. How can human rights respond and alleviate gender-based poverty? This monograph closely examines the potential of equality and non-discrimination at international law to redress gender-based poverty. It offers a sophisticated assessment of how the international human rights treaties, specifically the Convention on the Elimination of Discrimination Against Women (CEDAW), which contains no obligations on poverty, can be interpreted and used to address gender-based poverty. An interpretation of CEDAW that incorporates the harms of gender-based poverty can spark a global dialogue. The book makes an important contribution to that dialogue, arguing that the CEDAW should serve as an authoritative international standard setting exercise that can activate international accountability mechanisms and inform the domestic interpretation of human rights.
