Development Of A Modern Navy French Naval Policy 1871 1904:

The Development of a Modern Navy Theodore Ropp, 1987 An impressive study on technological change strategic theory the balance of power and the strategy of the weak

Big Business In Russia Jonathan A. Grant, 2010-11-23 Jonathan A Grant has written a highly original study of the Putilov works the most famous industrial conglomerate in the Russian Empire during the late nineteenth and early twentieth centuries With the emergence of a capitalist system in the Russian federation in the 1990s scholarly debate over the nature of Russian capitalism has been revived and with this study Grant issues a major challenge to the conventional wisdom on the nature of the Russian economy in the years before the Bolshevik revolution Grant argues that the Putilov Company which manufactured arms for the Russian state and a wide range of heavy industrial equipment for civilian use adopted business practices that resembled the experiences of large machinery and armaments manufacturers in Britain France the Austro Hungarian Empire and Germany This interpretation runs directly counter to the traditional and widely held view that Russian capitalism was shaped by the tsarist state's orders and subsidies and that the tsarist system was incompatible with the development of modern capitalism Grant makes direct comparisons between Putilov and the famous western firm of Krupp and Vickers illustrating similar business decisions made by both companies in terms of diversification of the product line and a penchant for private as opposed to state markets for primary income Grant has gone beyond Soviet works on the Putilov plant examining archival documents of the company and offering critical comments on both Soviet and Western scholarship on Russian economic and social history from the perspective of this important industrial enterprise Grant not only repeatedly demonstrates that the Putilov firm responded effectively to the changing market for its wide range of industrial products but also shows that the tsarist regime provided far more of the systemic regularity needed for capitalist development than generally believed Grant's work is a significant contribution to this ongoing debate offering a much needed case study of Russian business history and a comparative study that extends across national boundaries Big Business in Russia is essential reading for graduate students in Russian and European history and will also appeal to American and European business leaders eager to understand the historical background of the current economic challenges facing Russia

French Armoured Cruisers, 1887-1932 John Jordan, Philippe Caresse, 2019-12-19 Offers a fascinating look at the French Navy during the years leading up to World War I an excellent addition to any naval library Naval Historical Foundation Of all the threats faced by the Royal Navy during the first years of the twentieth century the one which stood out was the risk to Britain's sea lines of communication posed by France's armoured cruisers Fast well armed and well protected these ships could have evaded any attempted blockade of the French ports and supported by a worldwide network of overseas bases could potentially have caused havoc on the trade routes Between 1898 and 1901 the French laid down thirteen ships and completed nine in 1903 4 alone This book has as its subject the French armoured cruisers built from the late 1880s until shortly before the outbreak of the Great War beginning with the revolutionary Dupuy

de L me the world s first modern armoured cruiser and ending with the impressive six funnelled Edgar Quinet and Waldeck Rousseau The primary focus of the book is on the technical characteristics of the ships Detailed and labelled drawings based on the official plans are provided by John Jordan and each individual class of ship is illustrated by photographs from the extensive personal collection of Philippe Caresse The technical section is followed by a history in two parts covering the Great War 1914 18 and the postwar years during which the surviving ships saw extensive deployment as station cruisers overseas and as training ships This is the most comprehensive account published in English or in French and is destined be the standard reference for many years to come Brilliant absolutely brilliant War History Online **French Warships in the**

Age of Steam 1859-1914 Stephen S. Roberts,2023-01-04 This outstanding book will be essential for future studies of naval policy in the period between la Gloire and the Great War The Naval Review This book is the first comprehensive listing in English of more than 1400 warships that were added to the official French navy fleet list between 1 January 1859 and World War I It includes everything from the largest battleships to a small armoured gunboat that looked like a floating egg Reflecting the main phases of naval policy the ships are listed in three separate parts to keep contemporary designs together and then by ship type and class For each class the book provides a design history explaining why the ships were built substantial technical characteristics for the ships as completed and after major reconstructions and selected career milestones including the ultimate fate of each ship Following the earlier volumes written jointly with Rif Winfield French Warships in the Age of Sail 1626 1786 and French Warships in the Age of Sail 1786 1861 this trilogy now provides a complete picture of the development of French warships over a period of almost three centuries As a technical reference on the French ships of 1859 to 1914 this book is a must for the serious naval architecture student modeler or enthusiast So much solid information is packed in this book arranged logically clearly and with so many illustrations I cannot see where another volume on this subject can compete Highly recommended Nautical Research Journal Superlatives abound in describing this book arguably the finest naval shiplist ever created Warship International

Anglo-French Naval Rivalry, 1840-1870 C. I. Hamilton,1993 This is an extensively researched and thorough history of the British and French navies in the mid 19th century and the rivalry at sea between the two countries **Maritime Strategy and Sea Denial** Milan

Vego,2018-12-07 This book focuses on the theory and practice of maritime strategy and operations by the weaker powers at sea Illustrated by examples from naval and military history the book explains and analyzes the strategies of the weaker side at sea in both peacetime and wartime in defense versus offense the main prerequisites for disputing control of the sea and the conceptual framework of disputing control of the sea It also explains and analyzes in some detail the main methods of disputing sea control avoiding seeking decisive encounters weakening enemy naval forces over time counter containment of enemy naval forces destroying the enemy s military economic potential at sea attacks on the enemy coast defense of the coast defense capturing important positions basing areas and defense capturing of a choke point A majority of the world s

navies are currently of small or medium size In the case of a war with a much stronger opponent they would be strategically on the defensive and their main objective then would be to dispute control of the sea by a stronger side at sea This book provides a practical guide to such a strategy This book would be of much interest to students of naval power maritime security strategic studies and military naval history

Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

British Cruisers of the Victorian Era Norman Friedman, 2012-10-29 Gradually evolving from the masted steam frigates of the mid nineteenth century the first modern cruiser is not easy to define but for the sake of this book the starting point is taken to be Iris and Mercury of 1875 They were the RN's first steel built warships were designed primarily to be steamed rather than sailed and formed the basis of a line of succeeding cruiser classes The story ends with the last armoured cruisers which were succeeded by the first battlecruisers originally called armoured cruisers and with the last Third Class Cruisers Topaze class all conceived before 1906 Coverage therefore dovetails precisely with Friedman's previous book on British cruisers although this one also includes the wartime experience of the earlier ships

rn The two central themes are cruisers for the fleet and cruisers for overseas operations including but not limited to trade protection The distant waters aspect covers the belted cruisers which were nearly capital ships intended to deal with foreign second class battleships in the Far East The main enemies contemplated during this period were France and Russia and the book includes British assessments of their strength and intentions with judgements as to how accurate those assessments were

rn As would be expected of Friedman the book is deeply researched original in its analysis and full of striking insights another major contribution to the history of British warships

Handbook of 19th Century Naval Warfare Spencer Tucker, 2000 Spencer Tucker's narrative account of this crucial transitional phase in naval history opens with a summary of technology tactics and strategy at the end of the eighteenth century followed by accounts of the wars of the Napoleonic period and the factors that led to British naval supremacy The revolutions that followed in naval ordnance propulsion iron hulls and underwater warfare are described in detail and the author looks at how these were used mid century in both the Crimean and American Civil Wars He reviews the naval situation before the First World War examining naval thought and international attitudes towards battleship size and speed versus armour and shows how these important changes were put into practice in the Sino Japanese

Spanish American and Russo Japanese Wars The book concludes with an overview of the world naval balance on the eve of the First World War BOOK JACKET **Arming Against Hitler** Eugenia C. Kiesling,1996 In May June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead While many historians have focused on Frances failure to avoid this catastrophe Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies military doctrine and combat forces would preserve the nation

The Mediterranean Naval Situation, 1908-1914 Paul G. Halpern,1971 During the early part of the twentieth century all the Mediterranean powers were transforming or at least expanding their navies from mere coastal defense forces to modern war machines thus adding to a highly unstable political situation The naval challenge of the Triple Alliance to Britain and especially to France was a serious one Indeed this study demonstrates that the Mediterranean situation had great influence on the plans and estimates of the British Admiralty Paul G Halpern has uncovered new material in London Paris Rome and Vienna that helps to explain the plans and dispositions of Entente and Triple Alliance forces at the outbreak of the war A Survey of U.S. Naval Affairs, 1865-1917 Paolo Enrico Coletta,1987 To find more information on Rowman Littlefield

Battleships and Battle-cruisers, 1884-1984 Myron J. Smith,1985 **The Vulnerability of Empire** Charles Kupchan,1994 Kupchan provides detailed accounts of the imperial careers of Britain France Japan Germany and the United States At times he shows each of these states responded to changes in the international distribution of power by pursuing reasoned strategies that enhanced its prosperity and security At other times however they all engaged in bouts of self defeating extremism Kupchan argues that it was their perception of national vulnerability that drove them to such behavior When a state lacks the resources to cope with prospective adversaries decision makers justifiably adopt extremist policies In order to gain domestic support for these policies they sell to the polity conceptions and images of empire which alter strategic culture public attitudes the mindset of top elites and the organizational interests of elite institutions *The Emden-Ayesha Adventure* Hellmuth von Mücke,2000 A rousing firsthand account of a legendary World War I odyssey

Arms Limitation and Disarmament B.J.C. Mckercher,1992-10-26 This collection examines various aspects of the efforts

made to limit warfare through arms limitation and disarmament agreements in the period from the first Hague conference to the outbreak of World War II in Europe The issue for each contributor is not necessarily to show whether individual endeavors separate conferences and the rest were successful or unsuccessful though this is an important consideration Rather each chapter tends to offer differing points of view on accomplishments and failures because as is so often the experience in historical study the record is mixed and this situation is certainly no less characteristic of arms limitation and disarmament between 1899 and 1939 Written by experts on disarmament issues these chapters put into historical perspective how and why the effort to restrain war were undertaken at the Hague conferences the Washington conference and among antiwar groups Each contributor approaches this task using the method he or she deems most appropriate Some employ an historiographical approach others undertake to produce analyses based heavily on archival holdings in order to offer new interpretations of the past or revise existing ones This book will be of interest to students and teachers alike of modern history and political science
