Development Of Air Quality Standards:

Development of Air Quality Standards Arthur A. Atkisson, Richard S. Gaines, 1970 **Manual for the Development of State Recommendations for Air Quality Control Regions** United States. Consumer Protection and Environmental Health Service, 1970 British naturalist Jane Goodall provides an intimate portrait of a group of chimpanzees in the jungles of Africa which she has studied for many years **An Interactive History of the Clean Air Act** Jonathan Davidson, Joseph M Norbeck, 2011-12-05 The Clean Air Act of 1970 set out for the United States a basic yet ambitious objective to reduce pollution to levels that protect health and welfare The Act set out state and federal regulations to limit emissions and the Environmental Protection Agency was established to help enforce the regulations The Act has since had several amendments notably in 1977 and 1990 and has successfully helped to increase air quality This book reviews the history of the Clean Air Act of 1970 including the political business and scientific elements that went into establishing the Act emphasizing the importance that scientific evidence played in shaping policy The analysis then extends to examine the effects of the Act over the past forty years including the Environmental Protection Agency's evolving role and the role of states and industry in shaping and implementing policy Finally the book offers best practices to guide allocation of respective government and industry roles to guide sustainable development The history and analysis of the Clean Air Act presented in this book illustrates the centrality of scientific analysis and technological capacity in driving environmental policy development It would be useful for policy makers environmental scientists and anyone interested in gaining a clearer understand of the interaction of science and policy Offers an overview of the 1970 Clean Air Act and its subsequent effects Highlights the relationship between policy and scientific discovery Extracts lessons from the United States to apply to other policy and national contexts **Guidelines for the development of air quality standards and implementation plans** United States. National Air Pollution Control Administration, 1969 **Clean Air Act** United States. Congress. House. Committee on Science and Technology. Subcommittee on Energy Development and Applications, 1982 **Air Quality Act of 1967, Hearings ... 90-1, on H.R. 9509 and S. 780, August 15, 16, 17, 18, 21, 22, 23, 24, 1967** United States. Congress. House. Interstate and Foreign Commerce, 1967 Development of Air Quality Standards Richard S. Gaines, 1970 **Air Pollution Abstracts**, 1971 **EPA's Rulemakings on the National Ambient Air Quality Standards for Particulate Matter and Ozone** United States. Congress. House. Committee on the Judiciary. Subcommittee on Commercial and Administrative Law, 1997 Air Quality Act of 1967 United States. Congress. House. Committee on Interstate and Foreign Commerce, 1967 **Reducing the Averages** James Pearson, 2000 Book Description In 1967 the public clamor for more stringent air pollution control had increased throughout the nation As a result the Puget Sound Region was granted a new multi county air control agency After staffing it and developing regulations personnel began ticketing pollution sources beginning with the most onerous A real time monitoring network was installed and the staff began routine dispersion

modeling Indirect source controls bombed and were canceled Friction developed with the State air control agency over jurisdiction The U S EPA while supportive was maddeningly slow to act But successful control programs succeeded in reducing ozone smog carbon monoxide and particulate matter to healthful levels The biggest challenge was the control of the ASARCO Copper Smelter in Tacoma which had gradually reduced its sulfur dioxide SO₂ and arsenic emissions under variance As its last variance expired ASARCO elected to close largely for economic reasons and SO₂ became a non problem The staff continued its basic programs adding asbestos and wood stove control In its 20th year dissatisfaction on the part of the staff resulted in personnel changes and the agency began to look more like the U S EPA By the early 1990 s all health standards were successfully met Author s Bio After a varied engineering career Jim Pearson entered a new field with a brand new agency and candidly admits having made mistakes learning the new business He worked 22 years as an engineer for the agency the last 10 years of which were as Chief of the Engineering Division He holds BS and MS degrees in Civil Engineering and is a registered professional engineer **Air Quality Standards** United States. General Accounting Office,1986
