This refreshing volume introduces a theory for explaining cross national differences in the social practice of women and men in the areas of family and employment This provides a theoretical framework for the ensuing comprehensive cross national analysis of the degree and forms of labour market integration of women in three European countries Finland West Germany and the Netherlands from the 1950s until 2000 Cross national differences are explained with a focus on cultural change and the development of welfare state labour markets the family and social movements It is evident that change took place along different development paths that were based on deep rooted historical differences in the cultural ideals of the family Such historical differences and their explanations also form part of the analysis The results of this survey contribute to the further development of cross national sociology on social change social and gender inequality welfare state labour markets and family structures

*Development of Culture, Welfare States and Women's Employment in Europe*, 2007 *Women Entrepreneurs and the Global Environment for Growth* Candida G. Brush, Anne de Bruin, Elizabeth J. **Women, Employment and Organizations** Judith Glover, Gill Kirton, 2006-09-25 Women s employment is an area of considerable interest both from the point of view of equal opportunities and of economic competitiveness This book brings together the latest research on a series of key topics in the field of women s employment *The Oxford Handbook of Family Policy Over the Life Course* Mary Daly, Birgit Pfau-Effinger, Neil Gilbert, Douglas J. Besharov, 2023 Drawing on a multidisciplinary group of experts from many countries this Handbook is intended to be a reference work that provides students and scholars in policy related disciplines a wide ranging perspective on the diverse ways that family policies respond to modern issues and trends over the life course The Handbook is divided into two main parts The first part offers a

panoramic introduction to the setting and issues which contemporary family policies have been designed to address The second part and main body of the volume is organized around four benchmark periods that encompass the main stages of the family life cycle and social policies that are called into play during these stages *Work and Family Policy* Stephen Sweet, 2013-09-13 Numerous challenges exist in respect to integrating work and family institutions and there is remarkable cross national variation in the ways that societies respond to these concerns with policy This volume examines these concerns by focusing on cross national variation in structural cultural arrangements Consistent support is found in respect to the prospects of expanding resources for working families both in the opportunity to provide care as well as to remain integrated in the workforce However the studies in this volume offer qualifiers explaining why some effects are not as strong as might be hoped and why effects are sometimes restricted to particular classifications of workers or families It is apparent that when different societies implement similar policies they do not necessarily do so with the same intended outcomes and usage is mediated by how policies are received by employers and workers The chapters in this book speak to the merits of international comparative analysis in identifying the strategies challenges and benefits of providing resources to workers and their families This book was originally published as a special issue of *Community Work Family* Family Well-Being Almudena Moreno Minguez, 2012-07-15 In the international literature there is a broad scope for comparative research on the welfare regime family change and gender relations but we have no book that comprehensively collects the main research that has been conducted from the perspective of family well being Thus this volume focuses on the comparative analyse of family and well being in a European perspective a dimension which literature has not covered till the present This book collects the researches done in Europe on family well being and compares family change and well being in different institutional and cultural contexts It takes a deeper look at early evidence of family well being and presents a compilation of findings from the main researchers on this topic A broad range of topics is covered from the theorizing of children s well being to the development of specific measures of family well being The book also outlines pivotal methodological and conceptual issues A distinguished international group of researchers provide insights into the dynamics of family change and well being using indicators as a means to confront new phenomena as well as to bridge data and theory **Rethinking Gender, Work and Care in a New Europe** Triin Roosalu, 2016-04-29 Given the growing importance of Eastern European countries in the development of the EU there is an urgent need to reconstruct the recent dynamic developments in women s work and care in these societies and the socio political determinants thereof Considering their specific cultural economic and historical development it can be assumed that the trends and determinants of women s labour market trajectories in CEE countries differ significantly from those in the other European countries that have frequently made up the basis for established theories in social and labour market research This being the case can standard theoretical approaches mostly modelled on evidence from Western Europe be transferred to the analysis of Eastern European countries This edited

collection scrutinises pivotal aspects of women's careers in Eastern Europe providing a detailed overview of trends and determinants of women's employment in Eastern Europe and reflecting critically on theoretical approaches in social and labour market research      **Handbook of Research on Gender and Economic Life** Deborah M.
