Development Of Nomadism In Ancient Northeast Africa:

The Development of Nomadism in Ancient Northeast Africa Karim Sadr, 2017-01-30 Nomadism was one of the most important strategies for survival and it is still the strategy of choice for many cultures in Africa and the Near East. Nomadism can be best understood through an examination of its origins by asking why and how nomadism emerged as a way of life.

The Development of Nomadism in Ancient Northeast Africa Karim Sadr, 1991 Nomadism was one of the most important strategies for survival and it is still the strategy of choice for many cultures in Africa and the Near East. Nomadism can be best understood through an examination of its origins by asking why and how nomadism emerged as a way of life.

The Development of Nomadism Karim Sadr, 1988 *The Education of Nomadic Peoples* Caroline Dyer, 2006-06-01 Educational provision for nomadic peoples is a highly complex as well as controversial and emotive issue. For centuries nomadic peoples educated their children by passing on from generation to generation the socio cultural and economic knowledge required to pursue their traditional occupations. But over the last few decades nomadic peoples have had to contend with rapid changes to their ways of life often as a consequence of global patterns of development that are highly unsympathetic to spatially mobile groups. The need to provide modern education for nomadic groups is evident and urgent to all those concerned with achieving Education For All yet how they can be included is highly controversial. This volume provides a series of international case studies prefaced by a comprehensive literature review and concluding with an end note drawing themes together that sets out key issues in relation to educational services for nomadic groups around the world.

Nomads in the Middle East , *Ethnoarchaeology of the Kel Tadrart Tuareg* Stefano Biagetti, 2014-07-19 This book focuses on the issues of resilience and variability of desert pastoralists explicitly challenging a set of traditional topics of the discourse around pastoralism in arid lands of the Old World. Based on a field research carried out on the Kel Tadrart Tuareg in Libya various facets of a surprisingly successful adaptation to an extremely arid environment are investigated. By means of an ethnoarchaeological approach explored are the Kel Tadrart interactions with natural resources the settlement patterns the campsite structures and the formation of the pastoral archaeological landscape focusing on variability and its causes. The resilience of the Kel Tadrart is the key to understand the reasons of their choice to stay and live in the almost rainless Acacus Mountains in spite of strong pressure to sedentarize in the neighboring oases. Through the collection of the interviews participant observation mapping of inhabited and abandoned campsites remote sensing and archival sources various and different Kel Tadrart strategies perceptions and material cultures are examined. This book fills an important gap in the ethnoarchaeological research in central Sahara and in the study of desert pastoralism. Desert lands are likely to increase over the next decades but our knowledge of human adaptations to these areas of the world is still patchy and generally biased by the idea that extremely arid lands are not suited for human occupation.

Education Provision to Nomadic Pastoralists Saverio Krätli, 2001 Educationally pastoralists appear to be a paradox From the perspective of official education they are a complete failure scoring badly in terms of enrollment achievement attainment and gender balance However pastoralists are far from being unskilled Their daily lives require them to perform tasks involving high levels of individual and social specialization A consideration of this paradox should be central to analyses of the continuous failure with regard to nomads of the universal project of education Instead education programs appear to oppose nomadic culture at all levels from principles and goals to evaluation As a universal project education has had a very broad goal of the fulfillment of all individuals as human beings and a very narrow view of educational structure and content With regard to education of nomads this literature review suggests that such attitude should be reversed to a broader view and focused goals Policies should expand the view from statistics and the classroom to education as a broad phenomenon Education for nomads should be flexible multifaceted and focused enough to target specific structural problems such as social and economic marginalization lack of political representation or coping and interacting successfully with the challenges of globalization Sections of this literature review cover the educational rationale education as basic need and right education for development and integration practical problems and solutions mobility remoteness poverty sparse population distance education staff motivation language cultural problems conservatism ignorance child labor cultural alienation education of girls parent choice relevance impact and outcomes of education a Mongolia case study and key issues for future policy Contains 194 references TD
