Reimagining Intelligent Computer-Assisted Language Education Stevkovska, Marija, Klemenčič, Marijana, Kavaklı Ulutaş, Nurdan, 2024-10-18. Reimagining language education through intelligent technologies and computer assistance marks a shift in how we approach language learning in the digital age. With advancements in artificial intelligence and machine learning, there is potential to transform traditional methods into personalized educational experiences. Intelligent systems now offer adaptive learning pathways that cater to individual proficiency levels, learning styles, and progress rates, making language education more accessible and effective. These technologies beg further exploration to effectively provide real-time feedback and support, creating a more engaging and responsive educational experience. *Reimagining Intelligent Computer-Assisted Language Education* explores fundamental aspects of educational technology to improve language teaching and learning. It reimagines educational practice for language teaching and learning through the integration of educational technology for making the language teaching and learning process more efficient and engaging while improving learner performance and progress. This book covers topics such as artificial intelligence, language education, and academic writing and is a useful resource for education professionals, language learners, computer engineers, academicians, scientists, and researchers.

Honestly Biased Janu Goswami, 2025-10-15. Bias is one of the most persistent forces shaping human life. It appears in the most intimate spaces of family, silently influencing how children are raised and how relationships evolve. It emerges in professional environments, deciding who gets opportunities and whose voices are ignored. It shapes first impressions when strangers meet, reinforces cycles of poverty, hides within technological systems, and is woven into cultural traditions that dictate what is considered normal or acceptable. Though often invisible, bias quietly directs human decisions, relationships, and structures of power. This book is an exploration of these biases in their many forms. It does not simply

describe prejudice as an abstract concept but traces its presence across the everyday realities of modern life From the home to the workplace from society's treatment of the poor to the coded instructions of algorithms from personal encounters to global cultural exchanges the book shows how bias operates how it divides and how it can be challenged Blending analytical insight with philosophical reflection the book offers both a critique of the systems that perpetuate injustice and a hopeful vision of what is possible when awareness leads to transformation It invites readers to confront uncomfortable truths but also to imagine new ways of living that expand fairness empathy and dignity Ultimately this is not only a study of bias but a call to courage It reminds us that while bias may be a universal part of the human condition it does not need to define our destiny With awareness persistence and compassion humanity can reshape its future one choice one relationship one act of justice at a time
