From Trustworthy AI Principles to Public Procurement Practices Merve Hickok, 2024-10-21 This book is an early warning to public officials policymakers and procurement practitioners on the impact of AI on the public sector Many governments have established national AI strategies and set ambitious goals to incorporate AI into the public infrastructure while lacking AI specific procurement guidelines AI is not traditional software and traditional processes are not sufficient to meet the challenges AI

brings Today's decisions to embed AI and algorithmic systems into public system infrastructure can and will have serious repercussions in the future. The promise of AI systems is to make the public sector more efficient, effective, fair, and sustainable. However, AI systems also bring new and emerging risks which can impact rights and freedoms. Therefore, guardrails are necessary to consider the socio-technical dimensions and impact on individuals, communities, and society at large. It is crucial that public sector decision makers understand the emerging risks of AI systems, the impact on the agency and the wider public infrastructure, and have the means to independently validate vendor claims. This book is a result of interviews with more than 20 public procurement professionals across countries, offering an in-depth analysis of the risks, incidents, governance practices, and emerging good practices around the world, and provides valuable procurement policy and process recommendations to address and mitigate these risks. *Ai-driven Financial Education* Orlando Andrade, 2024-12-19

Focused on the new job I decided to adapt the company's way of collecting debts, the focus is to create an environment of interaction for collector and debtor to have satisfaction in solving the debt. The first focus was to change the name of the sector from COLLECTION to EDUCATIONAL INVESTMENT AND FINANCIAL SUPPORT sector; in this way, an incredible channel for debt moderation was created. I noticed the need for material that provided information on how to deal with Financial Education in the most diverse age groups; for this, I consulted an AI which offered me all the necessary subsidies to carry out this work. I had to ask the RIGHT QUESTIONS and the AI gave the content to transform a FAILED FINANCIAL LIFE into a VICTORIOUS AND CONTAGIOUS FINANCIAL LIFE. *The Second International Symposium on Generative AI and Education (ISGAIE'2025)* Rubén González Vallejo, Ghizlane Moukhliiss, Elisa Schaeffer, Vasileios Paliktzoglou, 2025-08-25

This book presents recent research on generative artificial intelligence (GenAI) and its transformative role in education. It constitutes the proceedings of the Second International Symposium on Generative AI and Education ISGAIE 2025. The book explores recent advancements in GenAI technologies and their emerging impact on teaching and learning practices across educational contexts. Beyond practical applications and various use cases, the book addresses emerging challenges and opportunities, offering critical reflections on the ethical, pedagogical, and institutional implications of GenAI adoption in education. This book serves as a comprehensive reference for researchers, teachers, education designers, technology developers, and decision makers who are working to rethink education using generative AI. **The Governance of Artificial Intelligence in the "Autonomous City"** Federico Cugurullo, Tan Yigitcanlar, Xiaoling Zhang, Vincent J. Del Casino Jr., Natalie Marie Gulsrud, Sarah Barns, 2023-10-18

Artificial intelligence (AI) is now mediating and in some cases seen to be controlling key urban services and infrastructures, thus becoming a prominent feature of the contemporary city. As portrayed in recent studies, the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans. At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines. While autonomous cars transport people, service robots run

shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore **School** ,1921 **Intellectual Property Law and the Fourth Industrial**
