New Literary Hybrids in the Age of Multimedia Expression Marcel Cornis-Pope, 2014-11-15 Begun in 2010 as part of the Histories of Literatures in European Languages series sponsored by the International Comparative Literature Association the current project on New Literary Hybrids in the Age of Multimedia Expression recognizes the global shift toward the visual and the virtual in all areas of textuality the printed verbal text is increasingly joined with the visual often electronic text This shift has opened up new domains of human achievement in art and culture The international roster of 24 contributors to this volume pursue a broad range of issues under four sets of questions that allow a larger conversation to emerge both inside the volume's sections and between them The four sections cover 1 Multimedia Productions in Theoretical and Historical Perspective 2

Regional and Intercultural Projects 3 Forms and Genres and 4 Readers and Rewriters in Multimedia Environments The essays included in this volume are examples of the kinds of projects and inquiries that have become possible at the interface between literature and other media new and old They emphasize the extent to which hypertextual multimedia and virtual reality technologies have enhanced the sociality of reading and writing enabling more people to interact than ever before At the same time however they warn that as long as these technologies are used to reinforce old habits of reading writing they will deliver modest results One of the major tasks pursued by the contributors to this volume is to integrate literature in the global informational environment where it can function as an imaginative partner teaching its interpretive competencies to other components of the cultural landscape

Digital Russia Michael Gorham, Ingunn Lunde, Martin Paulsen, 2014-03-05 Digital Russia provides a comprehensive analysis of the ways in which new media technologies have shaped language and communication in contemporary Russia It traces the development of the Russian language internet explores the evolution of web based communication practices showing how they have both shaped and been shaped by social political linguistic and literary realities and examines online features and trends that are characteristic of and in some cases specific to the Russian language internet

Extreme Trust Don Peppers, Martha Rogers, 2012-04-26 How companies can stay competitive in a world of total transparency With their first book 1993's *The One to One Future* Don Peppers and Martha Rogers introduced the idea of managing interactive customer relationships long before the Web and social networking made it standard business practice With *Extreme Trust* they look to the future once again predicting that rising levels of transparency will require companies to protect the interests of their customers and employees proactively even when it sometimes costs money in the short term The importance of this trustability will transform every industry Retail banks won't be able to rely as much on overdraft charges Consumers will expect retailers to remind them when they have unused balances on gift cards Credit card companies will coach customers to avoid excessive borrowing Cell phone providers will help customers find appropriate calling plans for their usage patterns Success won't come from top down rules and processes but from bottom up solutions on the part of employees and customers themselves And the most successful businesses will earn and keep the extreme trust of everyone they interact with
