Youtube in the Language Classroom Sebastian Altenhoff,2011-02 Seminar paper from the year 2009 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 0 University of Duisburg Essen Anglophone Studien language English abstract According to Ellis learning a language means making use of the language in R schoff Wolff 1999 54 This not only implies the claim of free spontaneous communication but also of dealing with and of experiencing the target language as such The claim of experiencing the target

language in the language classroom leads to a growing interest in the quality of the materials used According to Wolff 1998 any kind of learning no matter whether verbal or non verbal has to be embedded in a rich learning environment that has not been reduced concerning its complexity Authenticity is thus one of the main criteria in order to evaluate the quality of materials This criterion applies to all materials such as literature that have not been changed for the purpose of teaching and learning of course In this thesis however using authentic video in the language classroom will be considered and analysed according to its didactic benefits Integrating video in the language classroom does not necessarily mean having to watch and to analyse a whole film of ninety minutes Thanks to Web 2 0 applications such as YouTube the accessibility of short video clips advertisements or film excerpts has become very simple Because of the growing popularity of this webpage and of integrating Web 2 0 applications in the learning environments in general my entire analysis will relate to videos taken from YouTube This thesis aims to provide both a theoretical part I and a practical investigation part II of the topic in order to create a framework for analysis I will first of all give a short overview of the didactic benefits of integrating authentic video in the language classroom in general This survey is followed by a short description of the basic ideas of YouTube

Creating a Better World Anna Clarke, 2009 [Stanford Business](#), 2008 **The Flutist Quarterly**, 2007 **Brandweek**, 2011 *Uncharted Waters: Tapping the Depths of Our Community to Enhance Learning*, 2009 *Effects of Providing a Rationale for Learning a Lesson on Students' Motivation and Learning in Online Learning Environments* Tae Seob Shin, 2010 This study examined whether providing a rationale for learning a particular lesson influences students motivation and learning in online learning environments A mixed method design was used to investigate the effects of two types of rationales former student vs Instructor rationales presented in an online introductory educational psychology course Fifty nine participants were randomly assigned to one of the three conditions 1 a student rationale condition where students listened to a brief testimonial of a former student about the value of the presented lesson 2 an instructor rationale condition where students listened to an audio statement by the instructors about the value of the presented lesson and 3 a control condition where students were not provided with any rationale The treatment was given at the beginning of six two week modules each of which covered one specific topic in educational psychology Pre and post tests which included self report questionnaires measuring students perceptions about the value of the course interest in the course self determination autonomous regulation and their essay responses to a movie montage depicting various educational phenomena were administered at the beginning and end of the semester At the end of

semester students grades and perceptions of learning were also collected Results suggest that providing a rationale for learning had positive effects on students motivation and learning and its effects were affected by the source of rationale In terms of motivation students sense of autonomy increased over time whether they listened to student or instructor rationales Students who listened to instructor rationales reported an increase in their sense of relatedness to instructors while those who listened to student rationales reported a decrease in their relatedness to instructors In terms of learning both the quantitative and qualitative results indicate that listening to rationales provided by former students had the most positive effect on students final grades and their ability to apply major ideas covered in the course to real life problems Findings suggest that student rationales can be effective in promoting students motivation and learning in an online learning context This study adds to the existing body of literature by examining whether the source of rationale matters in promoting students learning and motivation The current study also focuses on the learning aspects of provisions of rationales By triangulating different learning outcome measures a better understanding of the effects of providing a rationale has on students learning has been achieved In addition the design of this study demonstrates how research grounded in theory can be conducted with strong ecological validity when implemented in regular online courses Unlike other studies where inauthentic tasks were given this project was done in a natural academic setting Finally the kinds of treatments that were developed for this study can easily be implemented in teaching practices in face to face or online environments The dissertation citations contained here are published with the permission of ProQuest llc Further reproduction is prohibited without permission Copies of dissertations may be obtained by Telephone 800 1 800 521 0600 Web page <http://www.proquest.com/en-US/products/dissertations/individuals.shtml> The Times Index ,2010 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement *Metropolis* ,2007-07

statics fluid statics engineering statics - Apr 16 2023

web some points to remember when solving fluid pressure problems the pressure due to the fluid always acts perpendicular the surface a particle underwater will feel the same pressure from all directions

14 7 fluid dynamics physics libretexts - Jul 07 2022

web sep 12 2022 the first part of this chapter dealt with fluid statics the study of fluids at rest the rest of this chapter deals with fluid dynamics the study of fluids in motion even the most basic forms of fluid motion can be quite complex for this reason we limit our investigation to ideal fluids in many of the examples

chapter 3 fluid statics university of iowa - Mar 15 2023

web chapter 2 pressure and fluid statics pressure for a static fluid the only stress is the normal stress since by definition a fluid subjected to a shear stress must deform and undergo motion normal stresses are referred to as pressure p for the general case the stress on a fluid element or at a point is a tensor for a static fluid

the surface a particle underwater will feel the same pressure from all directions pressure increases linearly with depth $p = \rho gh$ $p = \rho gh$ assumes a constant density and thus is valid only for incompressible

ii fluid statics louisiana tech university - Apr 04 2022

web these concepts are key to the solution of problems in fluid statics and lead to the following two points at the same depth in a static fluid have the same pressure the orientation of a surface has no bearing on the pressure at a point in a static fluid vertical depth is a key dimension in determining pressure change in a static fluid

the physics field of fluid statics thoughtco - Feb 02 2022

web apr 9 2018 fluid statics fluid statics is the field of physics that involves the study of fluids at rest because these fluids are not in motion that means they have achieved a stable equilibrium state so fluid statics is largely about understanding these fluid equilibrium conditions when focusing on incompressible fluids such as liquids as
