Improve customer experience with chatbots Beata Stefanowicz, 2023-02-13

We have come a long way in the past 70 years since chatting to a computer was first mentioned. A chatbot is a computer program that communicates with human users over text or through a speech-to-text system. Businesses can use chatbots to communicate with their customers and recreate the in-store shopping experience online. E-commerce companies can do this by welcoming visitors to their online store, offering support within arm's reach, showing personalized deals, using proactive sales techniques, helping customers find the right products, upselling items and services, handling complaints on auto pilot, offering membership cards, collecting feedback from shoppers, and offering multilingual support. Many e-commerce brands are already taking advantage of chatbots to get ahead of their competitors. Why not try them for yourself and see what this technology can do for your business?

Smart Bots, Happy Customers Gosia Szaniawska-Schiavo, 2024-08-26

Did you know that AI can automate up to 58% of customer service interactions? Our study on chatbot statistics also confirmed that almost 1.5 million people had at least one conversation with a chatbot within the past year. Well, AI revolutionized how businesses help their clients. It enabled 24/7 support through chatbots and virtual assistants, increased efficiency, and allowed human agents to focus on more complex issues. There is just one issue: Not every chatbot is AI. Simultaneously, not all AI-powered solutions will be perfect for all tasks related to customer service, especially in the e-commerce field. Believe us, we would know. At Tidio, we help 300k businesses worldwide automate customer service, collect leads on autopilot, and increase sales. Tidio is one of the most installed chatbot and live chat companies worldwide, specializing in providing tailored customer service solutions. We always strive to be on the cutting edge and respond to our customers' biggest challenges. One of them is strategically combining rule-based and AI-powered chatbots so that businesses can elevate their customer service to new heights.
