Simple Short Form Content Ideas For Beginners For College Students:

Creating Online Tutorials Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources; they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate-level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians*, Second Edition, will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers:

- Is a tutorial the right solution?
- Assessing diverse user needs
- Choosing the right technology
- Selecting and organizing instructional content
- Planning tutorial design elements
- Integrating assessment into tutorial design
- Maintaining and updating tutorials
- Finding online tutorial resources

After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools.

Mindfulness in Internet and New Media Wen-Ko Chiou, Chao Liu, Hao Chen, Shuhua Zhou, 2023-10-24 Mindfulness is about being aware in a certain way, being consciously aware on purpose, living in the present moment without mental judgment. In addition to the in-depth application of mindfulness in different subdisciplines of psychology (e.g., social, personality, clinical, developmental, health, organizational), there is also a trend toward cross-fertilization with other social and behavioral disciplines (e.g., design, kinesiology, sociology, family studies, education, anthropology, neuroscience, philosophy, economics, medicine, organizational science). However, the application of mindfulness in the field of communication is limited. With the rapid development of the Internet and new media, the study of Internet communication is growing rapidly. The Internet and new media make it easy to connect with others, explore a new world, and regard cyberspace as an extension of one's own thoughts and personality. Nevertheless, when people use the Internet and new media mindlessly, they will easily experience the social effects on their virtual selves and encounter psychological problems (e.g., network morality, network anxiety, network pornography, network addiction, and cyberbullying), which has become a widespread and serious problem. As an important part of positive psychology, mindfulness intervention has been proved to help improve a series of negative psychological states and promote positive emotions and subjective well-being. However, what theoretical and practical contributions can mindfulness in the Internet and new media bring remains unknown. Thus, this Research Topic focuses on the influence and intervention of mindfulness on the psychological problems.

caused by the network new media communication We welcome high quality studies using a variety of research methods including quantitative qualitative mixed methods and reviews on the second generation of mindfulness interventions and other meditation based interventions e g focused attention meditation transcendental meditation and loving kindness meditation This Research Topic encourages submissions that cover but are not limited to the following topics 1 The internet and new media guided mindfulness and loving kindness meditation practice 2 Mindfulness and interpersonal communication in the network network trust network security network intimacy 3 Mindfulness and network clustering behavior 4 Mindfulness and online consumer psychology 5 Mindfulness and cyber moral psychology cyberbullying cyber altruism and prosocial behavior 6 Mindfulness and online pornography 7 Mindfulness and internet addiction 8 Mindfulness and online psychological counseling 9 Mindfulness and new media anxiety
