Grocott,2024-10-07 It may seem surprising that the economic choices we make in society are often determined by ideas rather than scientific evidence or financial resources The consequences of such choices are often stark such as the austerity policies which eroded our ability to withstand crises like the Covid 19 pandemic This book explores the ideas that rule how our economy works how government operates and how workers organise A small number of historical economic ideas remain stubbornly prevalent and powerful today However they are largely based on questionable assumptions about human behaviour and unproven theoretical ideas about economics They were founded within the realms of philosophy and politics rather than hard science This book illustrates how politicians have selectively borrowed convenient economic concepts in order to promote and defend policies which entrench and escalate inequalities and other structural problems This accessible book invites readers to question the ideas that rule us and explore the challenges facing society It invites progressive thought about how we need to urgently organise action for the future **Youtube in the Language Classroom** Sebastian

Altenhoff,2011-02 Seminar paper from the year 2009 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 0 University of Duisburg Essen Anglophone Studien language English abstract According to Ellis learning a language means making use of the language in R schoff Wolff 1999 54 This not only implies the claim of free spontaneous communication but also of dealing with and of experiencing the target language as such The claim of experiencing the target language in the language classroom leads to a growing interest in the quality of the materials used According to Wolff 1998 any kind of learning no matter whether verbal or non verbal has to be embedded in a rich learning environment that has not

been reduced concerning its complexity Authenticity is thus one of the main criteria in order to evaluate the quality of materials This criterion applies to all materials such as literature that have not been changed for the purpose of teaching and learning of course In this thesis however using authentic video in the language classroom will be considered and analysed according to its didactic benefits Integrating video in the language classroom does not necessarily mean having to watch and to analyse a whole film of ninety minutes Thanks to Web 2 0 applications such as YouTube the accessibility of short video clips advertisements or film excerpts has become very simple Because of the growing popularity of this webpage and of integrating Web 2 0 applications in the learning environments in general my entire analysis will relate to videos taken from YouTube This thesis aims to provide both a theoretical part I and a practical investigation part II of the topic in order to create a framework for analysis I will first of all give a short overview of the didactic benefits of integrating authentic video in the language classroom in general This survey is followed by a short description of the basic ideas of YouTube
