Destutt De Tracy And The Origins Of Ideology:

Destutt de Tracy and the Origins of "ideology" ,1973 **Destutt de Tracy and the Origins of "ideology"** Emmet Kennedy,1978 *Science in Culture* Piotr Jaroszyński,2007 This book tries to uncover science s discoverer and explain why the conception of science has been changing during the centuries and why science can be beneficial and dangerous for humanity Far from being hermetic this research can be interesting for all who want to understand deeper what really conditions the place of science in culture *A Philosophe in the Age of Revolution, Destutt de Tracy and the Origins of "ideology"* Emmet Kennedy,1978 **The Authority of Experience** John C. O'Neal,2008-08-26 Sensationism a philosophy that gained momentum in the French Enlightenment as a response to Lockean empiricism was acclaimed by Hippolyte Taine as the doctrine of the most lucid methodical and French minds to have honored France The first major general study in English of eighteenth century French sensationism The Authority of Experience presents the history of a complex set of ideas and explores their important ramifications for literature education and moral theory The study begins by presenting the main ideas of sensationist philosophers Condillac Bonnet and Helvétius who held that all of our ideas come to us through the senses The experience of the body in seeing hearing smelling tasting and touching enabled individuals as John C O Neal points out to challenge the sometimes arbitrary authority of institutions and people in positions of power After a general introduction to sensationism the author develops a theory of sensationist aesthetics that not only reveals the interconnections of the period s philosophy and literature but also enhances our awareness of the forces at work in the French novel He goes on to examine the relations between sensationism and eighteenth century French educational theory materialism and ideology Ultimately O Neal opens a discussion of the implications of sensationist thought for issues of particular concern to society today *A Philosophe in the Age of Revolution* Emmet Kennedy,1978 **Semiotics** Roland Posner,Klaus Robering,Thomas Albert Sebeok,1997 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and

communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

The Origins of Contemporary France: The modern régime Hippolyte Taine,1894

The Columbia History of Western Philosophy Richard Henry Popkin,1999 Richard Popkin has assembled 63 leading scholars to forge a chronological account of the development of Western philosophical traditions From Plato to Wittgenstein and from Aquinas to Heidegger this volume provides lively in depth and up to date historical analyses of all the key figures schools and movements of Western philosophy Each chapter includes an introductory essay and Popkin provides notes that draw connections among the separate articles The rich bibliographic information and the indexes of names and terms make the volume a invaluable resource

Ideology and Social Science B. W. Head,2012-12-06 This book attempts to present a detailed and critical account of the thought of Antoine Louis Claude Destutt de Tracy 1754 1836 Major importance has been placed on the analysis of his published writings Biographical details have been provided only to the extent necessary to elucidate the circumstances of the composition and publication of his writings in particular the intellectual and political currents in France during the Revolutionary and Napoleonic periods The book has three main themes The first is Tracy s philosophy of ideologie which was concerned to clarify concepts and provide guarantees of reliable knowledge The second is Tracy s attempt to elaborate a science of social organisation la science sociale whose objective was to recommend institutions and policies which could maximise social happiness The third theme is Tracy s development of liberal and utilitarian approaches to the fields of politics economics and education This study began life as a doctoral dissertation at the London School of Economics and Political Science I am grateful for the guidance of my supervisor Professor Ken Minogue and for helpful comments from Professor Maurice Cranston Professor Jack Lively and Dr John Hooper
