

New town centre, Barking (200)

Architect: **James Fox Partnership**
 Location: **Barking, London**
 Client: **Barking and Dagenham Council**

Revitalising the centre of Barking in the east of London has been one of the United Kingdom's most important re-development projects of recent years. A programme was carried out over five years of new residential schemes. During the first phase, the library, facing from the 1970s was retained and transformed to include an art gallery and conference rooms. A six-storey residential building on the existing former Barking House factory site completes the ensemble, which contains 300 and two bedroom apartments. These are situated in a central area of the town, a shopping centre, a new parking facility and three new leisure buildings – Barking House, Lakeside Building and the cinema. A public square with a park-like atmosphere acts as a meeting place and focal point of the new town centre. Although all the buildings in the complex are highly individual in form and design, they are united by a shared colour palette that draws on local sources. The first is the palette, which takes its range of colours from the varied colours of the houses that are standing in the street. The other inspiration was the yellow and green striped top of the former B. Wilson's Laminade factory. The yellow striped stone facade of Barking is interrupted by horizontal aluminium panels such as some on the top of the cinema. The Barking House above the library makes use of the colours of the original, with horizontal aluminium panels in panel glass and bright yellow. This range of colours was also used on the 1970s Laminade building opposite Barking House, which together on the side of the building created a new green and yellow palette, combining with the renewed range of local houses.
