Determinants Of Grammatical Variation In English:

Determinants of Grammatical Variation in English Günter Rohdenburg, Britta Mondorf, 2003 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics *Phonological Determinants of Grammatical Variation in English: Chomsky's Worst Possible Case* Julia Schlüter, 2016 **Modulators of Cross-Language Influences in Learning and Processing** Anat Prior, Tamar Degani, Zofia Wodniecka, 2022-06-01 **Noun Phrase Complexity in English** Eva Berlage, 2014-06-05 What makes the noun phrase the man I saw more complex than the man This book explores that question **Competing Motivations in Grammar and Usage** Brian MacWhinney, Andrei L'vovich Mal'chukov, Edith A. Moravcsik, 2014 This volume examines the conflicting factors that shape the content and form of grammatical rules in language usage Speakers and addressees need to contend with these rules when expressing themselves and when trying to comprehend messages For example there are on going competitions between the speaker's interests and the addressee's needs or between constraints imposed by grammar and those imposed by online processing These competitions influence a wide variety of systems including case marking agreement and word order politeness forms lexical choices and the position of relative clauses Chapters in the book analyse grammar and usage in adult language as well as first and second language acquisition and the motivations that drive historical change Several of the chapters seek explanations for the competitions involved based on earlier accounts including the Competition Model Natural Morphology the functional typological tradition and Optimality Theory The book will be of interest to linguists from a wide variety of backgrounds particularly those interested in psycholinguistics historical linguistics philosophy of language and language acquisition from advanced undergraduate level upwards **The Expression of Possession** William McGregor, 2009 This collection of nine original articles deals with the expression of possession at various levels of grammar morphological phrasal and syntactic and from a typologically diverse range of languages including Germanic Oceanic Meso American and Australian Aboriginal There are two main aims The first is to reveal something of the range of constructions employed cross linguistically in the expression of possession and second to present an understanding of the possessive relation itself as a cognitive and linguistic phenomenon A guiding principle in the selection of contributors has been to invite linguists whose research while not necessarily directly dealing with possession touches on it and indicates that they are likely to provide fresh perspectives on this well trodden field Key features William McGregor is a well known expert in this field of research Possession is a paradigm for studies on typology ethnology etc because a multitude of linguistic and cultural varieties are reflected in this field new series textbook The Making and Breaking of Classification Models in Linguistics Jane

Klavan, 2024-06-04 The book provides a methodological blueprint for the study of constructional alternations using corpus linguistic methods in combination with different types of experimental data The book looks at a case study from Estonian This morphologically rich language is typologically different from Indo European languages such as English Corpus based studies allow us to detect patterns in the data and determine what is typical in the language Experiments are needed to determine the upper and lower limits of human classification behaviour They give us an idea of what is possible in a language and show how human classification behaviour is susceptible to more variation than corpus based models lead us to believe Corpora and forced choice data tell us that when we produce language we prefer one construction Acceptability judgement data tell us that when we comprehend language we judge both constructions as acceptable The book makes a theoretical contribution to the what why and how of constructional alternations

Corpus Linguistics and the Web Marianne Hundt, Nadja Nesselhauf, Carolin Biewer, 2007 Using the Web as Corpus is one of the recent challenges for corpus linguistics This volume presents a current state of the arts discussion of the topic The articles address practical problems such as suitable linguistic search tools for accessing the www the question of register variation or they probe into methods for culling data from the web The book also offers a wide range of case studies covering morphology syntax lexis as well as synchronic and diachronic variation in English These case studies make use of the two approaches to the www in corpus linguistics web as corpus and web for corpus building The case studies demonstrate that web data can provide useful additional evidence for a broad range of research questions

More Support for More-support Britta Mondorf, 2009 This book provides the most comprehensive account so far of novel and hitherto unexplained factors operative in the choice between synthetic prouder and analytic more proud comparatives It argues that the underlying motivation in using the analytic variant is to mitigate processing demands a compensatory strategy referred to as more support The analytic variant is claimed to be better suited to environments of increased processing complexity presumably owing to its ability to facilitate early phrase structure recognition the more transparent one to one relation between form and function and possibly because the degree marker more can serve as a structural signal foreshadowing cognitive complexity A bird s eye view of 24 determinants reveals that the processing effort which triggers the analytic comparative emanates from structures that are phonologically morphologically syntactically lexically semantically or pragmatically complex By bridging the gap between corpus based variation research and psycholinguistic and typological approaches the book breaks new ground in uncovering the functional motivation behind the continued variability of synthetic analytic contrasts

Annual Report on English and American Studies, 2007

Constructional Approaches to English Grammar Graeme Trousdale, Nikolas Gisborne, 2008 Presents a series of fresh perspectives on patterns and developments in English grammar from a constructional perspective This book provides a critical assessment of the role of constructions in key areas of grammatical theory from both synchronic and diachronic perspectives

English and American Studies in German 2005 Paul Georg Meyer, 2006 *Medieval*

English and Its Heritage Nikolaus Ritt, 2006 The volume features new work in English historical linguistics It focuses on Medieval Englishes but also discusses how processes originating there continued to unfold in later stages of linguistic evolution In language internal terms it deals with phonological morphological lexical and syntactic constituents At the same time cognitive pragmatic and social factors are taken into account All contributions go back to papers delivered at the 13th International Conference of English Historical Linguistics held at Vienna in 2004 They address central questions from new perspectives report empirical findings point out new directions for research make new methods relevant for the historical study of English manage to revise established views and provide a good survey of issues currently discussed in the community of historical English linguists Working Papers in Linguistics ,2003 Grammatical Change Rachel Hendery, Jennifer Hendriks, 2010 This volume comprises a collection of papers on the theme of grammatical change that evolved out of a workshop sponsored by the Centre for Research on Language Change The Australian National University The papers extend the boundaries of what has been addressed under the label of grammatical change by applying theories and models of grammatical change to new evidence by illuminating the historical relationships between grammar and other levels of linguistics and by extending the range of languages that have been examined from the perspective of grammatical change Languages discussed include Murriny Patha Walpiri Gurindji Walmajarri and Kayardild Lardil Yukulta English Dutch German Afrikaans French Italian Portuguese Spanish Serbo Croatian Bulgarian Macedonian Slovenian Albanian Greek Old Church Slavonic Tocharian Mandarin Cantonese Quechua Basque and Tok Pisin **Studies in the History of the English Language IV** Donka Minkova, Susan M. Fitzmaurice, 2008 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics Annual Bibliography of English Language and Literature Modern Humanities Research Association, 2007 Includes both books and articles Linguistics ,2006 *A Handbook of Varieties of English* Edgar Werner Schneider, Bernd Kortmann, 2004 A reference work on phonology and the first ever comprehensive overview of the morphology and syntax of varieties of English in the world *Language* George Melville Bolling, Bernard Bloch, 2010
