overview of different forms of a line's equation there are many different ways that you can express the equation of a line there is the slope intercept form standard form and also this page's topic point slope form each one expresses the equation of a line and each one has its own pros and cons point slope form this page's topic makes it easy to find the line's

intro to point slope form algebra video khan academy - Aug 22 2023

the point slope form is very useful when you don't have your y intercept it is used to write equations when you only have your slope and a point point slope form $y - a = m(x - b)$ for example your slope m is 3 and your point a, b is 9 10 you would substitute your y coordinate for a and your x coordinate for b

jan 20 2020 how to find $y = mx + b$ with two points find the y intercept given two points use $y - y_1 = m(x - x_1)$ to write the equation of the line given the point 4 5 and slope of 6 find y when x 24 so together we are going to learn how to write the equation of a line using point slope form represent equations from point slope form to slope intercept form

point slope form explanation review and examples albert - Sep 23 2023

mar 1 2022 in this post you will learn how to determine the point slope form of a line given two points or given a point and a slope you will also see how to graph and how to determine x and y intercepts using point slope form

point slope form calculator - Jul 21 2023

aug 13 2023 point slope form is a form of a linear equation where there are three characteristic numbers two coordinates of a point on the line and the slope of the line the point slope form equation is $y - y_1 = m(x - x_1)$ where (x_1, y_1) is a point on the line and m is the slope

point slope form math net - May 19 2023

point slope form point slope form is one of the more commonly used forms of a linear equation and has the following structure $y - y_1 = m(x - x_1)$ where m is the slope of the line (x_1, y_1) is a point on the line and x and y are variables representing other points on the line

point slope form definition overview study com - Oct 12 2022

point slope form in point slope form which is written like this $y - y_1 = m(x - x_1)$ y_1 is the y value of the known point on the line m is the slope and x_1 is the x value of the

$y - k = m(x - h)$ where m is the slope of the line and h, k is a point on the line any point works to write an equation in point slope form given a graph of that equation first determine the slope by picking two points then pick any point on the line and write it as an ordered pair h, k

point slope form review linear equations khan academy - Feb 16 2023

point slope is a specific form of linear equations in two variables $y - b = m(x - a)$ when an equation is written in this form m gives the slope of the line and a, b is a point the line passes through this form is derived from the slope formula want to learn more about point slope form check out this video
