## **Deutsche Flugschriften Zur Reformation 1520 1525:**

**The Fifteen Confederates** Geoffrey Dipple, 2014-07-17 The Fifteen Confederates was published anonymously in the fall of 1521 shortly after Martin Luther's hearing at the Diet of Worms and subsequent disappearance. The fifteen pamphlets that make up the book address religious, social, economic, and political challenges facing the German people. Their author Johann Eberlin von Gunzburg subsequently became one of the most prolific and popular pamphleteers of the German Reformation. As an important contribution to the pamphlet war that accompanied the beginnings of the Reformation in Germany, The Fifteen Confederates provides us a valuable window on the aspirations and dreams that accompanied Luther's initial calls for reform of the church and society.

**Grammatology of Images** Sigrid Weigel, 2022-08-16 Grammatology of Images radically alters how we approach images. Instead of asking for the history, power, or essence of images, Sigrid Weigel addresses imaging as such. The book considers how something visible gets transformed into an image. Weigel scrutinizes the moment of misapprehension of making an appearance and the process of concealment that accompanies any imaging. Weigel reinterprets Derrida's and Freud's concept of the trace as that which must be thought before something exists. In doing so, she illuminates the threshold between traces and iconic images, between something immaterial and its pictorial representation. Chapters alternate between general accounts of the line, the index, the effigy, and the cult image and case studies from the history of science, art, politics, and religion involving faces as indicators of emotion, caricatures as effigies of defamation, and angels as embodiments of transcendental ideas. Weigel's approach to images illuminates fascinating, unexpected correspondences between premodern and contemporary image practices, between the history of religion and the modern sciences, and between things that are and are not understood as art.

**Figures of Possibility** Niklaus Largier, 2022-03-15 From medieval contemplation to the early modern cosmopoetic imagination to the invention of aesthetic experience to nineteenth-century decadent literature and to early twentieth-century essayistic forms of writing and film, Niklaus Largier shows that mystical practices have been reinvented across the centuries, generating a notion of possibility with unexpected critical potential. Arguing for a new understanding of mystical experience, Largier foregrounds the ways in which devotion builds on experimental practices of figuration in order to shape perception, emotions, and thoughts anew. Largier illuminates how devotional practices are invested in the creation of possibilities, and this investment has been a key element in a wide range of experimental engagements in literature and art from the seventeenth to the twentieth century and most recently in forms of new materialism. Read as a history of the senses and emotions, the book argues that mystical and devotional practices have long been invested in the modulating and reconfiguring of sensation, affects, and thoughts. Read as a book about practices of figuration, it questions ordinary protocols of interpretation in the humanities and the priority given to a hermeneutic understanding of texts and cultural artifacts.
