of corporate governance culture and ethics Insurance as a mitigant for operational risk is also considered Quantitative and qualitative risk assessment methodologies covered include Loss data analysis extreme value theory causal analysis including Bayesian Belief Networks control risk self assessment and key indicators scenario analysis and dynamic financial analysis Views of industry insiders from organisations such as Standard Poors Fitch Hermes USS UN PRI Deutsche Bank and Alchemy Partners are presented together with those from experts at the FSA the International Accounting Standards Board IASB and the Financial Reporting Council In addition to investors this book will be of interest to actuaries rating agencies regulators and legislators as well as to the directors and risk managers of financial institutions in both the private and public sectors Students requiring a comprehensive knowledge of operational risk management will also find the book of considerable value
