Routledge Handbook of the Environment in Southeast Asia Philip Hirsch, 2016-09-13 The environment is one of the defining issues of our times and it is closely linked to questions and dilemmas surrounding economic development Southeast Asia is one of the world s most economically and demographically dynamic regions and it is also one in which a host of environmental issues raise themselves The Routledge Handbook of the Environment in Southeast Asia is a collection of 30 chapters dealing with the most significant scholarly debates in this rapidly growing field of study Structured in four main

parts it gives a comprehensive regional overview of and insight into the environment in Southeast Asia. Wide ranging and balanced, this handbook promotes scholarly understanding of how environmental issues are dealt with from diverse theoretical perspectives. It offers a detailed empirical understanding of the myriad environmental problems and challenges faced in Southeast Asia. This is the first publication of its kind in this field, a helpful companion for a global audience and for scholars of Southeast Asian studies from a variety of disciplines.

Learning From China? Bernhard Glaeser, 2013-09-05

First published in 1987, this volume was written to shed some light upon the nature and environmental consequences and wider relevance of development strategies in the Peoples Republic of China. It covers industrialisation, food production, energy use and landscape and settlement planning. The Chinese autocentred strategy is assessed from both the developmental and the environmental viewpoints. Decision making processes and the opportunities to implement environmental policy in other parts of the developing world are analysed, and the volume concludes with the view that benefits to other countries are likely to arise out of increased co-operation and exchange with China, although the Chinese model is by no means a panacea. All students and researchers interested in either environmental or developmental issues will find this book to be a substantial and enlightening contribution to literature.

South-East Asia's Environmental Future H. C. Brookfield, Yvonne Byron, 1993

Based on a conference organized by the United Nations University, this book analyses the driving forces of change, climatic uncertainties and major issues such as deforestation, sustainability of food production, deteriorating environments and the institutional problems which prevent better environmental management. It contains a great deal of new information and forthright discussions of a dangerous situation.

Exploration in Development Issues Nurul Islam, 2017-11-30

This title was first published in 2003. Nurul Islam, currently head of economic and social policy at the FAO UN and a key advisor at the International Food Policy Research Institute, has been a renowned expert on economic development for the past thirty years. Over that time he has researched and written about a wide range of economic development issues, focussing mainly on policy. For the first time ever, his most important writings have been brought together in this volume, reflecting not only Professor Islam's own views on particular issues but also providing a unique overview of the key debates and discussions taking place among academic economists and policy analysts over the past three decades. The collection is divided into three main sections: trade and aid, development strategy and food security, the section on food security being the most recent. It discusses food security in a broad sense, covering issues of availability and growth in food production, access or entitlement of individuals or households to basic food, and variability in food supplies and prices. In the section on Development Strategy, Professor Islam highlights how theoretical argument has veered away from organized development planning models which proved so important in the 1960s. He questions the role of models and policies throughout the decades, and following articles written in the 1970s or 80s, he includes articles he has recently completed, assessing the previous ones from his current

perspective In the final section on Trade and Aid he follows the academic debate on trade and exchange rate policies in developing countries from the 1960s to the progress of the WTO forums of today This is a wide ranging and thought provoking volume No matter whether the subject in question was examined in the 1960s or currently Professor Islam provides a challenging and insightful analysis and even the earliest articles retain relevance and will be of continuing interest
