With expanding world markets and increased international business competition comes a corresponding demand for organizations and individuals who are prepared to operate in these new arenas of global commerce. As a human resource professional, it is your job to ensure your team keeps pace with the current rush into these arenas. *Developing the Global Organization* gives you the strategies and insights to stay ahead of the pack. Do you know the difference between a global and multinational corporation? Are you familiar with economies of scope? Would your corporation benefit from partnership marketing? Which cross-cultural training strategies would best benefit your company's personnel? How do you globalize your organization? Today's HRD specialists now have answers to these and many similar questions that loom on the horizon of a growing era of organizational and corporate globalization. This book helps human resource professionals fulfill bottom-line responsibilities of preparing their organization's personnel for global interaction and competition. Within this text, the reader will discover various cross-cultural training and education strategies aimed at developing global organizations and managers who are able to conduct business successfully in world markets. *Developing the Global Organization* combines a theoretical foundation with practical information and suggestions that show you how to become an agent of change in creating a high-performance work force that is ready to capitalize on all international and intercultural opportunities that arise.

Developing Diversity in Organizations Ann M. Morrison, Kristen M. Crabtree, 1992. This document consists of a digest containing descriptions and analyses of 85 articles and books that are helpful for organizational leaders, human resource managers, and consultants in developing diversity in an organization. The works cited are organized according to a five-step action process derived from research describing practices that organizations can use to foster diversity. The five action steps constitute practical guidelines that managers require to assess an organization's diversity needs, design customized programs, and measure results. These steps are: 1. discover and rediscover diversity problems in the organization; 2. strengthen top management commitment; 3. choose solutions that fit a balanced strategy; 4. demand results and revisit goals; and 5. use building blocks to maintain momentum. These steps are described in detail at the beginning of their respective sections. The descriptions of references are organized into six main categories consisting of the five action steps and a small selection of general references. Within each category, references are sequenced in alphabetical order by the author's last name and are separated further by specific topics. Works presented at recent conferences or other reports available only from the author are listed in an appendix that lists some of these references including access information. Readers interested in learning more about a particular step in the process of developing diversity may use the general contents to turn first to that step or to a section of that step. An overview of the

digest can be found in the complete contents An index lists all of the authors DK **Diversity and Leadership** Jean Lau Chin, Joseph E.
