Developing Practitioners A Handbook Of Contextual Supervision:

Developing Practitioners Edwin G. Ralph, 1998-02-01 Presents a career development guide for college teachers

Pursuing Instructional Effectiveness in Higher Education Edwin George Ralph, 2004 The title of this book has two meanings One meaning expresses a sense of relief that during the last several years post secondary institutions have begun to pay serious attention to the enhancement of instruction on their campuses There has been an emergence of new organisations associations conferences seminars and workshops a proliferation of books journals and articles an expansion of research and investigative inquiry and a growth of interest among post secondary faculty members and administrators all of which are devoted to various aspects of the improvement of both teaching and learning at the undergraduate level These initiatives have combined to furnish undeniable evidence attesting to the pursuit of better teaching and learning in higher education Increasing numbers of post secondary educators students and tax payers at large not only welcome wholeheartedly this new emphasis and as suggested by the last clause in the title they feel it has been long overdue A second interpretation of the title and the one which is a key theme of this book emphasises the substantive concept of the use and management of time and timing as an integral component of effective instruction From the Introduction **Progress in Education R.**

Nata, 2002 This series presents substantial results from around the globe in selected areas of educational research The field of education is consistently on the top of priority lists of every country in the world yet few educators are aware of the progress elsewhere Many techniques programs and methods are directly applicable across borders This series attempts to shed light on successes wherever they may occur in the hope that many wheels need not be reinvented again and again

Supportive Learning Environment Jennifer Hindman, Leslie Grant, James Stronge, 2013-10-02 This entry in the James H Stronge Research to Practice Series focuses on the characteristics of teachers who create supportive learning environments for their students By conveying a sense of immediacy credibility and caring they communicate to students in both verbal and nonverbal ways that are essential to cultivating a positive and productive learning community In this book Stronge Grant and Hindman provide a comprehensive overview of the qualities of a supportive teacher They offer a bridge between research based theories and practical classroom applications with templates planning forms and other reproducibles The authors help teachers move toward establishing a learning environment that contributes to effective instructional practices Topics include engaging students and their families effective communication student ownership of the learning environment and much more
