The Wider Domain of Evolutionary Thought D.R. Oldroyd, K. Langham, 2012-12-06 Only in fairly recent years has History and Philosophy of Science been recognized though not always under that name as a distinct field of scholarly endeavour Previously in the Australasian region as elsewhere those few individuals working within this broad area of inquiry found their base both intellectually and socially where they could In fact the institutionalization of History and Philosophy of Science began comparatively early in Australia An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 60s similar to that which took place in other parts of the world Today there are major Departments at the University of Melbourne the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history philosophy and social studies of science Each volume will comprise a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area The series should however prove of more than merely local interest Papers will address general issues parochial topics will be avoided **Toward a Reasonable Society**

C. E. Ayres, 2014-06-23 Those who despair of our age will find in this stimulating book heartening answers to their questions about the fate of Western civilization and indications of the course humanity should follow if it is to save itself and the world The course is not new According to Ayres it is the same course that humanity has taken from the dawn of history but with too many detours in pursuit of false values It is the course that has brought us to the point of civilization where we now stand the course of developing knowledge and expanding truth of our increasing ability to exploit nature for our own welfare From the earliest stick tool through the invention of the wheel the Industrial Revolution and the marvelous scientific and technological developments of the space age science and technology knowledge and skill have enabled humankind to create for itself an increasingly better life But with this development has come a sense of conflict between our secular culture and our traditional values a conflict requiring a reevaluation of values This reevaluation is the subject of Ayres book His theme is that the abiding values are those relating to the common human experience shared by all peoples those values deriving from the quest for knowledge from the never ending struggle to harness the forces of nature to human use They are measured in terms of a standard of value that has the same meaning for all people And they have their validity in the cause and effect relationship basic to all human reasoning and to the oneness and interrelatedness of all life Toward a Reasonable Society is a defense of industrial culture It is a creative work drawing upon numerous areas of knowledge ethics sociology economics anthropology history philosophy psychology biology music the graphic arts mathematics the physical sciences to show the uniformities and the unchangeables in the oneness of human life It is an attack upon nostalgia and a defense of current arts

crafts knowledge wisdom and individual character It is an inspiring definition of freedom equality security abundance and other values of a democratic society In being all these things it assumes a point of view that looks toward the future And it is exciting reading The author s closely reasoned discourse leads with inevitable progress from one chapter to the next with something like the suspense of a detective story Each chapter is an intellectual episode leaving the reader with an eagerness to see what the next development will be The concreteness of the numerous examples enhances the clarity of the prose The compelling note is optimism for the future in further development of the industrial society that has achieved the most successful way of life humankind has ever known Evolution of Law: Formative influences of legal development ,1918
