A PRACTICAL GUIDE

Developing School Provision For Children With Dyspraxia A

Christine Macintyre

Developing School Provision For Children With Dyspraxia A:

Developing School Provision for Children with Dyspraxia Nichola Jones, 2005 Nichola Jones shows how to plan a whole school approach to including children with dyspraxia and developmental coordination disorder in this short and accessible guide. It offers those in managerial and supervisory roles within schools and special education support services clear guidance on successful models of provision that have worked successfully in schools and LEAs. The book includes sections on assessment, handwriting, gross motor programmes, adapting the PE curriculum, supporting parents, working with other agencies, listening to the children involved. *Managing Special Educational Needs* Suanne Gibson, Sonia Blandford, 2005-04-18 This is a most worthwhile book which contributes significantly to the general body of knowledge on managing pupils with special education needs. I found it interesting and informative. Schools cannot but benefit from the book's scope and from insights into the many and varied aspects of SEN provision. REACH A particular strength of the book is the way in which individual chapters provided self-contained material which lends itself for use in school-based staff development activities. The book includes a lot of information that SENCOs, inclusion managers and members of school leadership teams should find useful. SENCO Update The strongest point about this book is that it gives a good overview of the history of special educational needs policy in this country, including recent development on inclusion. TES Extra Special Needs It is a very practical account and should be a handbook for any newly appointed SENCO, while for experienced SENCOs and organisations where inclusion is not an issue, this book is a reminder of good practice. Special Written from a practitioner's perspective, this book shows schools how to effectively implement and manage an inclusive school environment. Drawing from their experience in a range of schools, the authors highlight the problems encountered by professionals in both primary and secondary school settings and offer practical solutions and advice. The book offers guidance on the role of the SENCO as a teacher and manager, government policy and legislation, self-evaluation, good practice and monitoring, how to relate SEN to school targets and development plans. Primary and secondary school teachers, headteachers, student teachers, SENCOs, LEA Advisers and professionals involved in the management of Special Educational Needs in schools will find the practical support offered in this book invaluable. **Play for Children with Special Needs** Christine Macintyre, 2010-01-05 This fully revised edition of *Play for Children with Special Needs* includes new research findings and explains their implications for practice. *Building Blocks for Learning: Occupational Therapy Approaches* Jill Jenkinson, Tessa Hyde, Saffia Ahmad, 2008-11-20 *Building Blocks for Learning: Occupational Therapy Approaches* is a resource book for educational staff and paediatric occupational therapists, especially those new to the field. It shows how the implications of physical, psychological, social and learning difficulties impact upon children's abilities. This highly practical book will help readers recognize when a student's poor performance within the classroom is a result of a medical condition or underlying motor and perceptual deficits. **Learning Styles and Inclusion** Gavin Reid, 2005-09-09 Gavin Reid provides some useful links to websites.

devoted to different approaches Some of the ideas relating to specific areas of the curriculum for example the suggested approaches to the teaching of modern languages are likely to be particularly valuable Reid also outlines strategies using learning styles for pupils with learning differences including attention disorders dyslexia developmental co ordination difficulties number difficulties and those on the autistic spectrum Times Educational Supplement Extra for Special Needs We have been lucky enough to hear Gavin speak twice in the last year and those of you who have also heard him will know that he is at the cutting edge of his field This book really encompasses those areas that are particularly topical and the buzz words on everyone s lips This book clearly sets out who is involved in inclusion and what is actually meant by learning styles Gavin not only offers practical strategies but also suggests how old hands could vary their teaching styles to appeal to all types of learners Therefore we feel this book is for the main stream teacher as well as the specialist and if this is a target area for your school this book might be a valuable addition to your bookshelf SATIPS In this book Gavin Reid has grasped the nettle of inclusion with both hands and provided a text that is full of common sense and practical suggestions as to how the mainstream teacher can draw upon recent psychological theory and research to enhance the learning of all children He jumps on no bandwagons but draws judiciously from a wide range of approaches to assessing learning styles and links what can be learned about groups and individuals from such techniques to helpful classroom practice Professor Bob Burden School of Education and Lifelong Learning University of Exeter Gavin Reid is that rare professional who not only explains how and why children learn best but also suggests a myriad of practical strategies to help them I highly recommend this book for everyone from undergraduates to old hands working toward successful inclusion Parents too will profit from Dr Reid s wise and comprehensive experience Jane M Healy Ph D Educational Psychologist and Author of Your Child s Growing Mind Brain Development and Learning from Birth to Adolescence 3rd Edition NY Broadway Books 2004 Drawing on his considerable experience as a teacher educational psychologist lecturer and author Gavin Reid illustrates how to assess pupils different learning styles and how to vary your teaching style to appeal to all types of learners including disaffected students and those with special educational needs This book provides an overview of the different stages in the learning cycle describes the differences between learners and emphasizes the role the classroom environment and different teaching styles play in children s ability to learn Readers will see how an understanding of learning styles can be used to encourage and promote good inclusive practice Ideas for assessment of learning styles and examples of different teaching styles will prove invaluable to class teachers trainee teachers SENCOs LEA advisers NQTs and NQT advisers and school management
