Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence

*Review of historical publications relating to Canada*, 1903 Index-guide to Library of the World's Best Literature, Ancient and Modern Edward Cornelius Towne, 1899 **American Culture, American Tastes** Michael Kammen, 2012-10-03 Americans have a long history of public arguments about taste the uses of leisure and what is culturally appropriate in a democracy that has a strong work ethic Michael Kammen surveys these debates as well as our changing taste preferences especially in the past century and the shifting perceptions that have accompanied them Professor Kammen shows how the post traditional popular culture that flourished after the 1880s became full blown mass culture after World War II in an era of

unprecedented affluence and travel He charts the influence of advertising and opinion polling the development of standardized products shopping centers and mass marketing the separation of youth and adult culture the gradual repudiation of the genteel tradition and the commercialization of organized entertainment He stresses the significance of television in the shaping of mass culture and of consumerism in its reconfiguration over the past two decades Focusing on our own time Kammen discusses the use of the fluid nature of cultural taste to enlarge audiences and increase revenues and reveals how the public role of intellectuals and cultural critics has declined as the power of corporate sponsors and promoters has risen As a result of this diminution of cultural authority he says definitive pronouncements have been replaced by divergent points of view and there is as well a tendency to blur fact and fiction reality and illusion An important commentary on the often conflicting ways Americans have understood defined and talked about their changing culture in the twentieth century     *Putnam's Monthly* ,1907
