Development and Employment of Fixed-wing Gunships, 1962-1972 Jack S. Ballard, 1982 **Development and employment of fixed-wing gunships 1962-1972** , Development and Employment of Fixed-Wing Gunships 1962-1972 Office of Air Force History and U S Air, Office of Office of Air Force History and U.S. Air Force, 2015-03-23 This is the sixteenth of a series of historical reports on Air Force plans and operations in Southeast Asia prepared by the Office of Air Force History The author a former history instructor at the Air Force Academy interviewed many key participants involved in the development and employment of gunships and has amassed extensive data relating to this unique weapon system Among the primary sources he consulted were official letters messages memoranda reports and minutes of meetings He also consulted a number of historical studies dealing with gunships Most of his research was conducted in the Office of Air Force History the Albert F Simpson Historical Research Center and Air University Library Maxwell AFB Ala and in the records of the Air Staff and Office of the Secretary of the Air Force In addition he visited the Aeronautical Systems Division Wright Patterson AFB Ohio and flew as an observer aboard a gunship during a training mission at Eglin AFB Fla In this history the author discusses the little known origin of the gunship and the important pioneering efforts of a handful of dedicated men He records the remarkable improvisations in aircraft and equipment that continually marked the progress of the gunship as a weapon system Further he examines the controversy that the gunships provoked as they evolved toward greater sophistication Throughout the narrative the author details the successes problems and failures of the gunship force The result is a very informative study which will be of long term interest and value to the Air Force Development and Employment of Fixed-Wing Gunships 1962-1972 Jack Ballard, 2012-05-25 One of the more striking aspects of the war in Southeast Asia was the adaptation of existing weapons in the American arsenal to the peculiar needs of an unconventional war This volume traces the history from initial conception of the fixed wing gunship in the early 1960 s through deployment and operations to the end of American combat involvement in early 1973 *The United States Air Force in Southeast Asia* Jack S. Ballard, 1982-01-01 Development and Employment of Fixed-Wing Gunships 1962-1972 Office of Air Force History, U.S. Air Force, 2015-02-11 One of the more striking aspects of the war in Southeast Asia was the adaptation of existing weapons in the American arsenal to the peculiar needs of an unconventional war Total air superiority presented to the United States great opportunities to support ground operations Very early some in the Air Force saw the need for a system that could saturate the ground with fire for interdicting enemy reinforcements for supporting ground troops in contact with the enemy

and for defending isolated hamlets and outposts under attack Such a weapons system had to be able to hit small often fleeting targets in difficult terrain at night and in bad weather through thick jungle cover It had to be flexible and survivable to linger for a protracted time over targets and above all it had to possess great firepower Nothing in the inventory could do all of this so the Air Force developed the fixed wing gunship This volume written by Lt Col Jack S Ballard during his assignment to the Office of Air Force History traces the gunship s history from initial conception in the early 1960s through deployment and operations to the end of American combat involvement in early 1973 Gunship theory flying an airplane in a pylon turn to aim side mounted guns at a fixed point on the ground had been known for years But it took men of vision and persistence to mate the theory with modern technology and then sell the idea to higher authorities Once the concept had been accepted the resulting family of gunships was designed to meet specific requirements then modified as requirements changed The result was one of the most innovative and successful weapons used in the war As impressive as was the hardware the author does not ignore the human element The gunship program had its share of high level indecision production snarls and equipment failure but these were overcome by sound management and determination Sometimes tactics were faulty even dangerous and had to be adjusted to the realities of combat Gunship crews enjoyed a relatively wide latitude in methods of attacking individual targets not infrequently they found themselves acting as airborne commanders directing the employment of other strike aircraft Most of the tactical decisions and a large number of key management decisions were made by officers of surprisingly junior rank The gunship story shows that the individual still makes a difference in modern war no matter what the dependence on technology

The United States Air Force (USAF) in Southeast Asia Department of Defense, U. S. Air Force (USAF), U. S. Government, 2017-05-30 This unique USAF publication traces the gunship s history from initial conception in the early 1960s through deployment and operations to the end of American combat involvement in early 1973 One of the more striking aspects of the war in Southeast Asia was the adaptation of existing weapons in the American arsenal to the peculiar needs of an unconventional war Total air superiority presented to the United States great opportunities to support ground operations Very early some in the Air Force saw the need for a system that could saturate the ground with fire for interdicting enemy reinforcements for supporting ground troops in contact with the enemy and for defending isolated hamlets and outposts under attack Such a weapons system had to be able to hit small often fleeting targets in difficult terrain at night and in bad weather through thick jungle cover It had to be flexible and survivable to linger for a protracted time over targets and above all it had to possess great firepower Nothing in the inventory could do all of this so the Air Force developed the fixed wing gunship Gunship theory flying an airplane in a pylon turn to aim side mounted guns at a fixed point on the ground had been known for years But it took men of vision and persistence to mate the theory with modern technology and then sell the idea to higher authorities Once the concept had been accepted the resulting family of gunships was designed to meet specific requirements then modified as requirements

changed The result was one of the most innovative and successful weapons used in the war As impressive as was the hardware the author does not ignore the human element The gunship program had its share of high level indecision production snarls and equipment failure but these were overcome by sound management and determination Sometimes tactics were faulty even dangerous and had to be adjusted to the realities of combat Gunship crews enjoyed a relatively wide latitude in methods of attacking individual targets not infrequently they found themselves acting as airborne commanders directing the employment of other strike aircraft Most of the tactical decisions and a large number of key management decisions were made by officers of surprisingly junior rank The gunship story shows that the individual still makes a difference in modern war no matter what the dependence on technology One of the most instructive aspects of Ballard's volume is the relationship between theory and experience Theory drove the initial design concept and employment but experience in combat drove modification of the aircraft and execution of tactics throughout the war While the evolution of the gunship and the changing character of its use were not always smooth processes the gunship worked successfully The goal of meeting mission requirements always remained paramount Lt Col Ballard interviewed many key participants involved in this story and gathered extensive data relating to this unique weapon His principal sources include official letters messages memoranda reports and minutes of meetings Most of his research was conducted in the Office of Air Force History the Albert F Simpson Historical Research Center and Air University Library Maxwell Air Force Base Ala in the records of the Air Staff and Offices of the Secretary of the Air Force

Night Hunters William P. Head, 2014-03-18 In *Night Hunters* air power historian William P. Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC 130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror *Night Hunters* offers a clear view of the role of gunships and of close air support in US wars In today's never ending brushfire wars the AC 130s continue to uphold their reputation for excellence

Aerial Interdiction Mark, 1995-07 Examines the practice of air interdiction in three wars World War II the Korean War the war in Southeast Asia The author proposes a realistic objective for interdiction preventing men equipment supplies from reaching
