

NEA WEEKLY TALK PROGRAM

" Development Approach in Nepal; Based on the Development Emergency - Why and How?? "

Speaker

ER.DR. NARAYAN PRASAD SUBEDI

SDE, Department of Water Resources and Irrigation

Dr. Subedi holds Master's from Nepal and a Ph.D. from Japan. He has 15+ years of experience in leading water resource and river management projects like CFRD Dhap Dam, major rivers such as Karnali, West Rapti, Babui, Tamakoshi, Bhotekoshi, and Sunkoshi across Nepal. His research on flood hazards and damage assessment associated with sediment transportation was published internationally.

Abstract: Nepal's journey of planned development over the past seven decades has delivered progress, but the anticipated outcomes remain unmet. Achieving high and sustainable economic growth through infrastructure development faces challenges due to the limited resources and inefficiencies in existing frameworks. The current rules, regulations, organizational structures, and approaches need revamping to overcome these barriers. To address this, a new approach, termed 'Development Emergency,' is proposed and could be implemented upto 15 years. This approach ensures rapid advancement of development projects by incorporating streamlined procurement processes, separate legal and managerial arrangements, strong leadership, autonomous public agencies with defined authority and responsibilities, assured manpower and budget, and mechanisms for immediate implementation.

Development Experience Of Nepal:

Nepal's Development Experiences Maheshwor Man Shrestha, 2000 **Nepal'S Enduring Poverty** Sukhdev

Shah, 2015-08-18 Theory of economic growth has made remarkable progress over the past three decades that has helped give us a better understanding of factors that induce or inhibit growth. In practice though a majority of countries have failed to increase growth and improve living conditions. The elixir that has been absent from traditional growth theories is the role of an enabling environment that is needed to induce and support growth. This book a case study of Nepal's poverty presents the view that non economic factors play an outsized role in determining the productive use of economic resources which is critical to spur growth to a much greater extent than the level of resources a country commands. The theme developed in this book is that a country's institutional weaknesses create a hostile environment for economic growth to occur and be sustained. Institutional handicaps exercise powerful constraints on the efficiency of use of resources and creation of wealth. This happens because institutions are rooted in a country's history, its culture, emotions, and even in national psychology.

Canvas of Nepal's Developmental-Landscape and Leanings for Nation-Building Anil Kumar Thakur, This book is about Nepal's development journey and its experience where readers of developing and developed countries can get current prospect of development. It narrates about importance of Nation building and learnings from different countries. Challenges of Federal system, good governance, civil service have been highlighted to understand our current Political situation. Opportunities in Potential sectors like Agriculture, Tourism, hydroelectricity, IT and many others has to be tapped. We are witnessing how South Asian countries are addressing their development demands. We need to learn from each other's and cooperate for faster growth. Countries aspiration of overall development can be replicated through applying best practices of many other countries. To be graduated as middle income country in 2026 and achieving SDG 2030 Nepal need better coordination's. There are challenges of sustainable economy. Physical infrastructure and social development due to limited resources and natural Disaster. Learning from past success and failure. Government, Private and Social sector has to work together for developed Nepal. I am indebted to the contribution of so many scholars that has been referred writing this book.
