Development Globalisation And Sustainability:

Development, Globalisation and Sustainability John Morgan, 2001 One of five new additions to the EPICS range published in 2001 dealing with more popular topics for the new specifications EPICS brings a fresh approach to topics of current interest allowing students to acquire an up to date and in depth understanding of geographical issues Each topic provides a wide range of detailed case studies and offers an intergrated approach to all aspects of geographical study Globalization and Sustainable Development Martin Oyevaar, Diego Vazquez-Brust, Harrie W.M. Van Bommel, 2017-09-16 This important core textbook explores the complex and dynamic nature of globalization and sustainability analyzing the main ideas ethical principles and processes driving the growth and development of the global economy Including a wide range of international cases from a variety of industries it anchors key concepts in a modern global context and provides an overall picture of what it means to be a sustainable business Bridging international business business ethics and sustainable development the text enables students to place core concepts into a modern global context and provides an extensive and engaging pedagogical framework that carries the student from a foundation level through to a more advanced analysis This is an ideal textbook for undergraduate and postgraduate students taking modules in international business sustainable development the global economy or globalisation *Globalisation and Sustainable Development in Latin America* Suranjit Kumar Saha, David Parker, 2002 The core objective of this book is to illustrate how the forces of globalisation impact upon the prospects for sustainable development using Latin America one of the major emerging regions of the world as a case study The book seeks to bring together the two hitherto separate paradigms of globalisation and sustainable development into one analytical framework This the authors hope will increase support for furthering sustainable development in developing countries in the context of globalisation Globalisation and Sustainable Development in Latin America includes contributions written by established and respected Latin American authors translated into English for the first time *Technology, Globalization, and Sustainable Development* Nicholas A Ashford, Ralph P Hall, 2018-08-06 Technology Globalization and Sustainable Development offers a unified transdisciplinary approach for transforming the industrial state in order to promote sustainable development The authors present a deep analysis of the ways that industrial states both developed and developing are currently unsustainable and how economic and social welfare are related to the environment to public health and safety and to earning capacity and meaningful and rewarding employment The authors offer multipurpose solutions to the sustainability challenge that integrate industrial development employment technology environment national and international law trade finance and public and worker health and safety The authors present a compelling wake up call that warns of the collision course set between the current paths of continued growth and inevitable unsustainability in the world today Offering clear examples and real solutions this textbook illustrates how the driving forces that are currently promoting unsustainability can be refocused and redesigned to reverse course and improve the state of the world This book is essential reading for those

teaching and studying sustainable development and the critical roles of the economy employment and the environment

Globalization and Sustainable Economic Development Piya Mahtaney, 2013-07-31 In a world in transition and an era of transformation Mahtaney calls for reflection and an analysis of a wide canvas of global economic experience Her new work initiates a thorough review of the strategies and policies that have been pursued over the past two decades The economic meltdown compelled the beginning of the next phase of globalization and she contends that the future will see an increase in globalization As crucial questions arise about the direction in which globalization is headed and the sustainability of economic growth and reform the fundamental objective of this exciting work is to elucidate crucial insights about the next phase of development in the world economy

Globalization, Environmental Law, and Sustainable Development in the Global South (Entire Book in Open Access). Paolo Davide Farah, Kirk W. Junker, 2023 Globalization is a word with many meanings Some people say globalization is responsible for having lifted millions of people out of poverty over the past decades Other people say that globalization is neocolonialism All will agree that the processes that accompany globalization have had tremendous impacts on the environment Commodification of the environment along with environmental degradation have led to an almost universal awareness of the negative effects of such crises as disrupted climate The conservation and restoration of the environment as well as the protection of biodiversity are essential for human life including its economic components The international community has responded to the challenge by shifting away from the Brundtland Commission's intergenerational concept of development which meets the needs of current generations without compromising the ability of future generations to meet their own needs to equating development with economic development under the New York Convention and reserving a third and separate pillar for economics over and against social concern and the environment However promising the concepts sustainable development and sustainability may have been they have become overused and meaningless Like worn out coins they became just placeholders To re inscribe meaning in the metal of sustainable development the authors in this book examine environmental problems caused facilitated or exacerbated by globalization as seen from the perspectives of the Global South and emerging economies Investments trade and technological advances are key driving forces of transition in these countries The economic development component also known as green growth policies may be preferred by globalizing forces which also regard it as most suitable to cope with climate disruption for example With the globalization of economics comes some aspects of the globalization of law The globalization of environmental law that is currently under formation in the Global South addresses the integration of the ecological and economic components by analyzing the contribution of emerging and developing economies Sometimes environmental law is part of the solutions sometimes environmental law is part of the problems In this book the terms Global South and emerging economies are included as alternative conceptualizations to the developed and developing countries But this alternative conceptualization itself is a divide that enables globalization In the chapters of this book the perspectives of the Global South

and emerging economies are presented by lawyers from Brazil Ethiopia India Mongolia Nigeria and St Vincent and the Grenadines as well as from the European states of France Georgia Germany and Slovakia The authors are natives of either emerging economies or of the Global South or work extensively in those regions All of the book s themes are mentioned in the title globalization environmental law sustainable development the Global South implementation and challenges

Tourism and Sustainability Martin Mowforth,Ian Munt,2003-12-08 Tourism and Sustainability explores and challenges the notions of development sustainability globalisation and power and their relationship to contemporary tourism in the third world *The Dilemma of Sustainability in the Age of Globalization* Mohamed El-Kamel Bakari,2017-09-05 The Dilemma of Sustainability in the Age of Globalization A Quest for a Paradigm of Development offers an exhaustive overview of the different political social economic and cultural circumstances that paved the way for the inception of sustainable development It particularly traces the evolution of this project in an unpropitious context of neo liberal capitalism and globalization By means of an in depth critical comparative analysis of the two phenomena of sustainable development and globalization this book highlights aspects of both their divergence and convergence on issues such as development man nature relationship and society This distinctive approach pinpoints the theoretical and factual aspects of clash and affinity between globalization and sustainability and spotlights some potential harmonization between the two on different levels On the whole this book covers a few gaps in the contemporary literature that heightened the need for analysis of the viability of implementing the project of sustainable development in a context of neoliberal capitalism Given the highly interdisciplinary nature of its topic a holistic approach is utilized throughout this book integrating historical literary economic political and scientific material The first part of this book is largely based on a critical comparative analysis of the two vying paradigms of development by means of a thorough juxtaposition of their theoretical and ideological underpinnings and backed up by lucid examples statistics and case studies In later sections this book provides an analysis and discussion of both the extrinsic and intrinsic obstacles to promoting sustainability in the current socio economic paradigm of development and closes by offering glimpses of hope for the future of humankind by underlining the potential of new initiatives to revive sustainable development in the 21st century Globalization and Sustainable Development in Africa Bessie House-Soremekun,Toyin

Falola,2011 The first comprehensive work on globalization within the context of sustainable development initiatives in Africa

Globalisation and Sustainable Development Vladimir F. Krapivin,2011-04-09 This interdisciplinary book parameterizes the global ecodynamic process The discussion considers basic global problems of the Nature Society System NSS dynamics and reviews key problems of ensuring its sustainable development The book includes an analysis of trends in changing ecological systems and estimates characteristics of current global ecodynamics The authors propose a new approach to NSS numerical modelling and demonstrate the results of modelling the dynamics of this system s characteristics Globalisation, Economic Transition and the Environment Philip Lawn,2013 This book focuses on three critical issues pertaining to the

broader goal of sustainable development namely the degenerative forces of globalization ecological sustainability requirements and how best to negotiate the economic transition process While the applicability of ecological sustainability to sustainable development is obvious the association between economic transition and sustainable development and more particularly how globalization forces can impact negatively on the sustainable development process is poorly understood Philip Lawn brings together some of the leading practitioners in the field of sustainable development to discuss these issues and to outline ways to achieve sustainable development without the perceived need for continuous growth The book culminates with a number of policy recommendations and institutional modifications to assist nations and the global community to achieve sustainable development This book will prove invaluable for academics and researchers in ecological environmental and natural resource economics as well as sustainable development globalization and international trade Practitioners and policy makers at all levels will find this resource both interesting and instrumental to their work

Globalization, Environmental Law, and Sustainable Development in the Global South Kirk W. Junker, Paolo Davide Farah, 2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners

Delivering Development Edward R. Carr, 2011-02-01 In Delivering Development author Edward Carr calls into question the very universal unquestioned assumptions about globalization development and environmental change that

undergird much of development and economic policy Here he demonstrates how commonly held beliefs about globalization and development have failed the global poor Over his 13 years of working along what he calls globalization's shoreline a world region buffeted by the economic political and environmental decisions of those living in wealthier places Carr has concluded that most experts misunderstand what they are trying to fix and cannot tell if they are fixing it Delivering Development is an eye opening you are there book that compels the reader to question conventional wisdom redefines what assistance to the developing world really means and explores alternative ways of achieving meaningful enduring improvements to human well being Globalisation, FDI, Regional Integration and Sustainable Development Anthony Bende-Nabende, 2017-10-05 This title was first published in 2002 Anthony Bende Nabende focuses on the ongoing globalization process which has sparked an unprecedented world wide debate He provides a one stop centre for a balanced coverage of the theoretical empirical and policy issues linking globalization with foreign direct investment regional economic integration and economic growth and sustainable development This stimulating book comprehensively explores the theoretical and empirical literature inter linking the aforementioned factors from the anti globalization activists viewpoint and from the pro globalization proponents perspective It proposes policies that individual countries should pursue based on the recognition that globalization generates both positive and negative effects These comprise policies required to maximise the economic benefits globalization may generate and those that aim to eliminate or at least minimize the negative development oriented effects globalization may engender and hence to propel sustainable development The book will be an essential guide for students academics and those involved in international economics environmental studies international relations and growth and development studies International Law and Sustainable Development Nico J. Schrijver, Friedl Weiss, 2004-08-10 The concept of sustainable development has attracted considerable attention in recent years and has become of pivotal importance not only in scientific and political discourse but also increasingly in the practice of states and of relevant international organisations Since 1992 and within a remarkably short period of time sustainable development has been endorsed and recognised in a number of instruments of international law Thus it is incorporated in various environmental treaties as well as in international fisheries agreements the 1995 Agreement Establishing the World Trade Organisation WTO and EU law Sustainable development and related concepts also feature in a number of international judicial decisions of the 1990s for example those of the International Court of Justice and the WTO Appellate Body The chapters assembled in this book illustrate various aspects of efforts of policy makers regional and national interest groups to invoke and rely upon international law for the realisation of the objective of sustainable development They deal in particular with recent examples of the practice of states and of relevant international organisations especially in such areas as international trade foreign investment regulation human rights and natural resources and waste management Furthermore some chapters are dedicated to a review of relevant practice at the regional and national level *Tourism and Sustainability*

Martin Mowforth, Ian Munt, 2015-12-22 By January 2015 the world's richest 80 people had as much wealth as the poorest 50 per cent of the world's population. It is a global unevenness through which the barriers to the migration of Third World migrants to wealthy First World nations go ever higher while the barriers to travel in the reverse direction are all but extinct. So how exactly does tourism contribute to narrowing this glaring inequality between the rich and poor? Are ever expanding tourism markets a smoke-free socioculturally sensitive form of human industrialisation? Is alternative tourism really a credible lever for reducing global inequality and eliminating poverty? *Tourism and Sustainability* critically explores the most significant universal geopolitical norms of the last half century: development, globalisation and sustainability, and through the lens of new forms of tourism demonstrates how we can better get to grips with the rapidly changing new global order. The fourth edition has been extensively revised and updated and benefits from the addition of new material on climate change and tourism. Drawing on a range of examples from across the Third World, Mowforth and Munt expertly illustrate the social, economic and environmental conditions that continue to affect the tourism industry. With the first edition hailed by Geoffrey Wall as one of the most significant books produced on tourism since the turn of the millennium, *Tourism and Sustainability* remains the essential resource for students of human geography, environmental sciences and studies, politics, development studies, anthropology and business studies as well as tourism itself.

Globalisation and Sustainable Development in Latin

America Suranjit Kumar Saha, David Parker, 2002 The core objective of this book is to illustrate how the forces of globalisation impact upon the prospects for sustainable development using Latin America, one of the major emerging regions of the world, as a case study. The book seeks to bring together the two hitherto separate paradigms of globalisation and sustainable development into one analytical framework. This, the authors hope, will increase support for furthering sustainable development in developing countries in the context of globalisation. *Globalisation and Sustainable Development in Latin America* includes contributions written by established and respected Latin American authors translated into English for the first time.

Europe, Globalization and Sustainable Development John Barry, Brian Baxter, Richard Dunphy, 2004-03-01 This edited volume considers the ways in which European states and the European Union can and should organize themselves economically and socially in order to address the challenges of sustainable development. It will interest students and researchers of environmental policy and European politics.

Globalization, the Human Condition, and Sustainable Development in the Twenty-first Century Arno Tausch, Almas Heshmati, 2013-10-01 *Globalization, the Human Condition, and Sustainable Development in the Twenty-first Century: Cross-national Perspectives and European Implications* is a cross-national 175-nation based exploration of the deep crisis in which Europe currently finds itself. Investigating the effects of dependency theory and world systems theory upon the global success of eight dimensions of development including democracy, environmental sustainability, employment, social cohesion, high quality tertiary education and gender justice, this study argues that the current European crisis has been precipitated by the pro-globalist policies of the European Commission.

and that in the near future these policies threaten to enter Europe into a destructive race to the bottom

Handbook of Globalization and the Environment Khi V. Thai, Dianne Rahm, Jerrell D. Coggburn, 2017-09-25

Proponents of globalization argue that it protects the global environment from degradation and promotes worldwide sustainable economic growth while opponents argue the exact opposite. Examining the local, national, and international impacts of globalization, the *Handbook of Globalization and the Environment* explores strategies and solutions that support healthy economic growth, protect the environment, and create a more equitable world. The book sets the stage with coverage of global environmental issues and policies. It explores international sustainable development, the evolution of global warming policy, transborder air pollution, desertification, space and the global environment, and human right to water. Building on this foundation, the editors discuss global environmental organizations and institutions with coverage of the UN's role in globalization, the trade environment nexus, the emergence of NGOs, and an analysis of the state of global environmental knowledge and awareness from an international and comparative perspective. Emphasizing the effects of increasingly integrated global economy on the environment and society, the book examines environmental management and accountability. It addresses green procurement, provides an overview of U.S. environmental regulation and the current range of voluntary and mandatory pollution prevention mechanisms in use, explores a two-pronged approach to establishing a sustainable procurement model, and examines a collaborative, community-based approach to environmental regulatory compliance. The book concludes with an analysis of controversial issues such as eco-terrorism, North-South disputes, environmental justice, the promotion of economic growth through globalization in less developed countries, and the ability of scientists to communicate ideas so that policy makers can use science in decision making.
