Development In Disasterprone Places Studies Of Vulnerability:

Development in Disaster-prone Places James Lewis,1999 This book addresses the long overdue imbalance in disaster management an over emphasis on post disaster assistance and a lack of attention to vulnerability reduction It answers the fundamental question in this debate how can we mould pre disaster development initiatives to become the most appropriate means for vulnerability reduction The book reasserts and reapplies some of the basic concepts and issues which emerged in the 1960s and 1970s with the message that development is a prime medium both of vulnerability and its reduction The author examines requirements for long term change so that conditions which have become the context for catastrophe can be modified By focusing on longer term policies and activities now emergency relief efforts have a positive context within which to contribute to development and the likelihood of recurrence will be reduced The book contains case studies from Sri Lanka the Caribbean and the South Pacific and focuses on hazards of all kinds setting out to redress the balance between large scale disasters of global significance and small scale disasters that are a matter of everyday existence

Natural Disaster and Development in a Globalizing World Mark Pelling,2003-08-29 The number of humanitarian disasters triggered by a natural hazard has doubled every decade since the 1960s At the same time the global economic growth rate per capita is twice its 1960s value Does this mean economic growth is independent of the impacts of natural disaster Natural Disaster and Development in a Globalizing World is the first book to acknowledge the full implications of globalization for disaster and development The contributors to this book fully examine global processes and how they might affect disaster risk at the global scale links between international issues such as diplomatic relations the growth of non governmental organizations and the health of the international insurance industry and disaster risk the interaction of these large scale forces with local conditions through case study analysis of individual disaster events In his revealing work author Pelling makes clear the links between global scale processes and local experiences of disaster and underlies the difficulty of attributing blame for individual disasters on specific global pressures He argues that action to reduce disaster must be coordinated at the local national and global scales and that there is a need for greater integration across the physical and social sciences In this context the human rights agenda is seen as a way of moving disaster reduction efforts forward

Handbook of Disaster Research Havidán Rodríguez,William Donner,Joseph E. Trainor,2017-11-16 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research It provides an interdisciplinary approach to disasters with theoretical methodological and practical applications Attention is given to conceptual issues dealing with the concept disaster and to methodological issues relating to research on disasters These include Geographic Information Systems as a useful research tool and its implications for future research This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow

The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation Ilan Kelman,Jessica Mercer,JC

Gaillard,2017-09-19 The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation aims to provide an overview and critique of the current state of knowledge policy and practice encouraging engagement and reflection on bringing the two sectors together This long awaited and welcomed volume makes a compelling case that a common research agenda and a series of practical policies and policy recommendations can and should be put in place Over 40 contributions explore DRR including CCA in five parts The first part presents and interrogates much of the typical vocabulary seen in DRR including CCA not only pointing out the useful and not so useful dimensions but also providing alternatives and positive examples The second part explains how to move forward creating and supporting positive crossovers and connections while the third one explores some aspects of multi dimensional approaches to knowing and understanding The fourth part argues for a balanced approach to governance taking both governmental and non governmental governance as well as different scales of governance into consideration The final part of the Handbook emphasises DRR including CCA as an investment rather than a cost and connects its further implementation with livelihoods of people around the world This handbook highlights the connections amongst the processes of dealing with disasters and dealing with climate change It demonstrates how little climate change brings which is new and emphasises the strengths of placing climate change within wider contexts in order to draw on all our strengths while overcoming limitations with specialities It will prove to be a valuable guide for graduate and advanced undergraduate students academics policy makers and practitioners with an interest in disaster risk reduction and climate change

Post-Disaster Reconstruction of the Built Environment Dilanthi Amaratunga,Richard Haigh,2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency scale and intensity Despite huge improvements in the emergency response permanent reconstruction is often uncoordinated inefficiently managed and slow to begin International agencies are geared to an efficient response in terms of humanitarian relief but they are not well versed in the requirements of long term reconstruction which is often constrained by lack of planning and poorly coordinated management The construction industry is typically engaged in a range of critical activities after a disaster including provision of temporary shelter in the immediate aftermath and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to Post Disaster Reconstruction of the Built Environment identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult Written by an international team of experts this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man made disaster and identify the planning and management processes required by the industry to mount an effective response

Flood Handbook Saeid Eslamian,Faezeh A. Eslamian,2022-04-18 Floods are difficult to prevent but can be managed in order to reduce their environmental social cultural and economic impacts Flooding poses a serious threat to life

and property and therefore it is very important that flood risks be taken into account during any planning process. This handbook presents different aspects of flooding in the context of a changing climate and across various geographical locations. Written by experts from around the world, it examines flooding in various climates and landscapes taking into account environmental, ecological, hydrological and geomorphic factors and considers urban agriculture, rangeland, forest, coastal and desert areas. Features: Presents the main principles and applications of the science of floods including engineering and technology, natural science as well as sociological implications. Examines flooding in various climates and diverse landscapes taking into account environmental, ecological, hydrological and geomorphic factors. Considers floods in urban agriculture, rangeland, forest, coastal and desert areas. Covers flood control structures as well as preparedness and response methods. Written in a global context by contributors from around the world.

Climate Change and Cities
Cynthia Rosenzweig, William D. Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29. The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities. ARC3 2 is the second in a series of global science based reports to examine climate risk, adaptation and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3 2 is to inform the development and implementation of effective urban climate change policies leveraging ongoing and planned investments for populations in cities of developing, emerging and developed countries. This volume like its predecessor will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers, urban planners, policymakers charged with developing climate change mitigation and adaptation programs and a broad spectrum of researchers and advanced students in the environmental sciences.

Indigenous Knowledge and Disaster Risk Reduction Rajib Shaw, Anshu Sharma, Yukio Takeuchi, 2009. Indigenous Knowledge (IK) has been practised in communities over time. There are several news after major disasters on how these IK has been effective to protect the lives and properties of people and communities. Some of the IK has been orally transmitted and some are documented by local organisations sporadically. Asia being one of the most disaster prone areas in the world, people and communities have developed their coping mechanisms over time which is reflected in the form of IK. While many organisations recognise the importance of IK for disaster risk reduction (DRR), there has been few systematic study on analysing the principles of IK and its applicability to the modern context. The book is one of the first and unique attempts of systematic study of IK in DRR. The key challenge will start after the publishing of the book to make it a useful reference material for decision making, research, implementation and documentation. The target of the book is professionals, practitioners, researchers and graduate students in the related field.
