different ways to be self employed which can provide you with more freedom and flexibility while still bringing in some money If you want to work at home then this is the technology which is enabling the change and it is allowing nomads to work from home Companies are recognising the potential of this new method of working and the first areas to embrace the new way of working are the legal ones However it is not just the legal firms and public sector which are looking to employment technology in order to cut costs Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits For example restaurants are using recruitment technology in order to lower salaries and costs Until a few years ago when every restaurant had a fixed cost of hiring training and maintenance the vast majority of restaurants were able to pay 100% of their employees salaries This meant that it was possible to pay a manager less than a waiter and save money However with the inclusion of recruitment technology the cost of hiring employees is being cut by up to 50% This does not necessarily mean that the amount of profit is increased but employees are able to be assigned to different tasks meaning that they spend less time in front of customers thus increasing their profits Interested to know more Then Scroll up Click on Buy now with 1 Click and Get Your Copy Now      **Agentic AI & Serverless AI Integration** Larry Shawn,2025-03-22 Book Title Agentic AI Serverless AI Integration N8N Automation Tool for Orchestrating Autonomous AI Workflows with LangChain AutoGen LangGraph and Serverless Execution Amazon Optimized Book Description Unlock the next evolution of AI development with Agentic AI Serverless AI Integration the essential hands on guide for building real time autonomous AI systems that scale This book is your comprehensive blueprint for designing deploying and managing intelligent multi agent systems using powerful tools like LangChain AutoGen and LangGraph seamlessly integrated into serverless AWS environments and n8n s no code orchestration platform Whether you re an AI engineer cloud architect or automation professional you ll learn how to harness the full potential of Python Hugging Face Transformers and LLM driven agents to streamline business operations optimize workflows and drive intelligent automation at scale Explore how to implement LangChain powered AI agents with persistent memory dynamic reasoning and modular pipelines Master AutoGen s multi agent collaboration framework for task delegation human agent interaction and contextual adaptability Deploy serverless microservices that power real time decision making efficient secure and compliant with modern enterprise standards Inside this book you ll gain actionable insights into Architecting cost effective serverless AI systems with AWS Lambda EventBridge and Step Functions Building modular agentic frameworks with LangChain LangGraph and PyTorch 2 0 Integrating AutoGen to coordinate intelligent agents across complex workflows Orchestrating end to end automation with n8n s low code no code platform Enabling secure scalable and compliant AI operations for enterprise grade applications Deploying LLMs as operating systems for data processing API calling and human like reasoning Creating real world workflows for sales automation customer support analytics and more With extensive code walkthroughs architecture diagrams and real world use cases this book empowers you to bridge the gap between state of the art AI and practical
