The United States vs. China C. Fred Bergsten, 2022-02-24 After leading the world economy for a century the United States faces the first real challenge to its supremacy in the rise of China Is economic or broader conflict well beyond the trade and technology war that has already erupted inevitable between the world's two superpowers Will their clash produce a new economic leadership vacuum akin to the 1930s when Great Britain was unable to play its traditional leadership role and a rising United States was unwilling to step in to save the global order In this sweeping and authoritative analysis of the competition for global economic leadership between China and the United States C Fred Bergsten warns of the disastrous consequences of hostile confrontation between these two superpowers He paints a frightening picture of a world economy adopting Chinese characteristics in which the United States after Trump abdicated much of its role engages in a self defeating attempt to decouple from its rival Drawing on more than 50 years of active participation as a policymaker and close observation as a scholar Bergsten calls on China to exercise constructive global leadership in its own self interest and on the United States to reject a policy of containment avoid a new Cold War and instead pursue conditional competitive cooperation to work with its allies and especially China to lead rather than destroy the world economy Also available as an audiobook
