that although always termed a worldwide crisis many developing countries and BRIC states have not been affected Second drawing upon the impact of globalization and the Internet new implications for the sourcing of business ideas will be generated A lot of attention has been paid to the development of start ups and the characteristics of entrepreneurs However the step in the development chain where the idea is generated has received comparably low attention This paper thus tries to explore some sources and mechanisms evolved through globalization and use of the Internet Third a case study designed to explore the above mentioned new framework and implications is expected to support the development of a new model It is therefore the overall purpose of this paper to produce a theoretically grounded and practically applicable model A model that should cover the most important aspects when copying and implementing a business concept from a different country
