Agile is broken Most Agile transformations struggle According to an Allied Market Research study 63% of respondents stated the failure of agile implementation in their organizations The problems with Agile start at the top of most organizations with executive leadership not getting what agile is or even knowing the difference between success and failure in agile Agile transformation is a journey and most of that journey consists of people learning and trying new approaches in their own work An agile organization can make use of coaches and training to improve their chances of success But even then failure remains because many Agile ideas are oversimplifications or interpreted in an extreme way and many elements essential for success are missing Coupled with other ideas that have been dogmatically forced on teams such as agile team rooms and an overall inertia and resistance to change in the Agile community the Agile movement is ripe for change since its birth twenty years ago Agile 2 represents the work of fifteen experienced Agile experts distilled into Agile 2 The Next Iteration of Agile by seven members of the team Agile 2 values these pairs of attributes when properly balanced thoughtfulness and prescription outcomes and outputs individuals and teams business and technical understanding individual empowerment and good leadership adaptability and planning With a new set of Agile principles to take Agile forward over the next 20 years Agile 2 is applicable beyond software and hardware to all parts of an agile organization including Agile HR Agile Finance and so on Like the original Agile Agile 2 is just a set of ideas powerful ideas To undertake any endeavor a single set of ideas is not enough But a single set of ideas can be a powerful guide Forthcoming Books Rose Army, 1998 *Time Out Film Guide*, 2007 **50 Business Ideas to Start With Little Or No Money Powered by AI** Tom Berty, 2025-10-26 What if I told you that starting your own business no longer depends on having a fat bank account That the biggest barrier to your entrepreneurial dreams isn't money it's knowing where to start Enter the AI revolution With free AI tools at your fingertips you can brainstorm create market and even automate a business almost entirely on your own This book isn't just theory it's a hands on guide to turning your ideas into real businesses fast Inside you'll discover 50 actionable business ideas you can start with little or no money all powered by free AI From service gigs to creative projects digital products local businesses and side hustles with serious growth potential this book walks you step by step through building your business testing it and scaling it all while letting AI handle the heavy lifting You'll meet your new AI business partner tools like ChatGPT Google Gemini Canva CapCut and more and learn how to set up your AI toolbox to brainstorm plan write design and market like a pro even if you've never done it before You'll discover how to test ideas quickly validate demand without spending a dime and start small while thinking smart Want to launch a service business this week You'll learn how to sell skills you already have even if you think you don't have any From AI assisted virtual assistants to social media managers blog writers resume optimizers and small business automation consultants every idea comes with demo prompts you can use right now Feeling creative AI can help you design logos generate print on demand art create videos e book covers and more all in record time
