success     **Cyber Security in the Age of Artificial Intelligence and Autonomous Weapons** Mehmet Emin Erendor,2024-11-19 Although recent advances in technology have made life easier for individuals societies and states they have also led to the emergence of new and different problems in the context of security In this context it does not seem possible to analyze the developments in the field of cyber security only with information theft or hacking especially in the age of artificial intelligence and autonomous weapons For this reason the main purpose of this book is to explain the phenomena from a different perspective by addressing artificial intelligence and autonomous weapons which remain in the background while focusing on cyber security By addressing these phenomena the book aims to make the study multidisciplinary and to include authors from different countries and different geographies The scope and content of the study differs significantly from other books in terms of the issues it addresses and deals with When we look at the main features of the study we can say the following Handles the concept of security within the framework of technological development Includes artificial intelligence and radicalization which has little place in the literature Evaluates the phenomenon of cyber espionage Provides an approach to future wars Examines the course of wars within the framework of the Clausewitz trilogy Explores ethical elements Addresses legal approaches In this context the book offers readers a hope as well as a warning about how technology can be used for the public good Individuals working in government law enforcement and technology companies can learn useful lessons from it     *Information Systems Research in Vietnam, Volume 3* Nguyen Hoang Thuan,Dang-Pham Duy,Hoanh-Su Le,Tuan Q. Phan,2025-01-25 This book the third volume of Information Systems Research in Vietnam presents a special theme that focuses on two emerging and critical topics of the twenty first century Digital Transformation and Sustainable Development Digital transformation which consists of digitization of products and digitalization of work processes has brought forth exciting new business models that disrupt traditional industries Digital transformation has been embedded in the 2030 National Digital Transformation Programme of the Vietnamese government leading to numerous digital businesses that offer significant value in various sectors including retail manufacturing education and health care Partly due to the United Nations UN 17 Sustainable Development Goals SDGs specifying the key development areas and outlining collective actions to ensure continuing peace and prosperity for people and the planet organizations in Vietnam are becoming increasingly aware of the importance of sustainable development and the adoption of sustainability governance frameworks such as ESG to gain strategic advantages in the turbulent markets Information systems IS in particular has profound impacts on achieving Sustainable Development However best practices and case studies about Digital Transformation and how this transformation and IS applications influence Sustainable Development in Vietnam have not been documented and studied in spite of the rapid developments in these areas in both public and private sectors This book therefore contributes to the existing body of knowledge and benefits a wide range of readers in several ways Firstly the book benefits scholars and students both in Vietnam and globally by advancing knowledge and presenting research on the latest

trends in contemporary topics such as Digital Transformation and Sustainable Development especially in the under researched Vietnam context Secondly industry practitioners and experts both in Vietnam and globally will benefit from reading this book to keep up with the current trends case studies and applications Thirdly by presenting the most up to date knowledge on the topic this book creates a shared understanding to help facilitate future research in the IS field as well as providing the background to pave the way for collaboration between scholars experts and industry practitioners
