inventor and futurist's successor to his landmark book *The Singularity Is Near* explores how technology will transform the human race in the decades to come. Since it was first published in 2005, Ray Kurzweil's *The Singularity Is Near* and its vision of an exponential future have spawned a worldwide movement. Kurzweil's predictions about technological advancements have largely come true with concepts like AI intelligent machines and biotechnology now widely familiar to the public. In this entirely new book, Ray Kurzweil brings a fresh perspective to advances toward the Singularity, assessing his 1999 prediction that AI will reach human level intelligence by 2029 and examining the exponential growth of technology that in the near future will expand human intelligence a millionfold and change human life forever. Among the topics he discusses are rebuilding the world atom by atom with devices like nanobots, radical life extension beyond the current age limit of 120, reinventing intelligence by connecting our brains to the cloud, how exponential technologies are propelling innovation forward in all industries and improving all aspects of our well-being such as declining poverty and violence and the growth of renewable energy and 3D printing. He also considers the potential perils of biotechnology, nanotechnology and artificial intelligence including such topics of current controversy as how AI will impact employment and the safety of autonomous cars and After Life technology which aims to virtually revive deceased individuals through a combination of their data and DNA. The culmination of six decades of research on artificial intelligence, *The Singularity Is Nearer* is Ray Kurzweil's crowning contribution to the story of this science and the revolution that is to come.
